Part I Concepts, Methodology and Techniques

1	Introduction	3
1.1	Introduction to Complexity and Change of the Dynamic Systems . . .	3
1.2	Concepts of Systems and System Dynamics	5
1.3	Open and Feedback Systems	5
1.4	Modes of Behaviour of Dynamic Systems	8
1.5	Models and Simulation	9
1.6	Systems Thinking and Modelling	12
1.7	Usefulness of Models	12
1.8	Structure of the Book	13
	References	14
	Bibliography	14
2	Systems Thinking: System Dynamics	15
2.1	Introduction	15
2.2	Systems Thinking Methodology	15
2.2.1	Problem Identification	17
2.2.2	Dynamic Hypothesis	20
2.2.3	Causal Loop Diagram	21
2.2.4	Stock–Flow Diagram	22
2.2.5	Parameter Estimation	23
2.2.6	Model Validation, Sensitivity Analysis and Policy Analysis	23
2.2.7	Application of the Model	24
2.3	Critical Aspects of Systems Thinking	24
2.4	Participatory Systems Thinking	25
2.5	Systems Thinking in Action	25
2.5.1	Introduction	26
2.5.2	Differential Equation Model and Stock–Flow Diagram	27
2.5.3	Simulation and Policy Analysis	31
	References	34
	Bibliography	35

3	Causal Loop Diagrams	37
3.1	Introduction	37
3.2	Causal Loop Diagrams	37
3.3	Steps in Causal Loop Diagram	39
3.4	Examples	41
3.4.1	Population	41
3.4.2	Carbon Metabolism in Green Plant	41
3.4.3	Food Security	42
3.4.4	Price Determination of a Commodity	43
3.4.5	Fishery Dynamics	45
3.4.6	Forest Dynamics	46
3.4.7	Electricity Supply	47
3.4.8	Global Warming	48
	References	51
	Bibliography	51
4	Stock and Flow Diagram	53
4.1	Introduction	53
4.2	Stock	54
4.3	Flow	55
4.4	Converter	56
4.5	Delays	57
4.5.1	Role of Delay	57
4.5.2	Choice of Delay Function	57
4.6	Identification of Stock and Flow	59
4.7	Mathematical Representation of Stock and Flow	59
4.8	Solution Interval	62
4.9	Functions Without Integration	62
4.10	Functions Containing Integration	66
4.10.1	Smooth	66
4.10.2	Information Delay	67
4.10.3	Material Delay	69
4.11	Examples	72
4.11.1	Population Model	72
4.11.2	Grain Storage System	75
4.11.3	Food Security Model	77
4.11.4	Commodity Production Cycle Model	81
4.11.5	Food Relief Model	86
4.11.6	Crop Livestock Model	89
4.11.7	Penaeid Shrimp Model	93
4.11.8	Crop Irrigation Model	102
4.11.9	Pollution Model	108
	References	116
	Bibliography	118

5	Parameter Estimation and Sensitivity Analysis	119
5.1	Introduction	119
5.2	Parameter Estimation Techniques	119
5.3	Estimation Using Disaggregated Data	120
5.3.1	Table Functions	121
5.4	Estimation Using Aggregated Data	124
5.4.1	Estimation Using a Model Equation	124
5.5	Estimation Using Multiple Equations	127
5.6	Sensitivity Analysis	127
5.7	Size of Solution Interval (DT)	129
	References	131
	Bibliography	132
6	Tests for Confidence Building	133
6.1	Introduction	133
6.2	Tests of Model Structure	135
6.2.1	Structure Verification Test	136
6.2.2	Parameter Verification Test	136
6.2.3	Extreme Condition Test	137
6.2.4	Boundary Adequacy Test	137
6.2.5	Dimensional Consistency Test	138
6.3	Tests of Model Behaviour	139
6.3.1	Behaviour Reproduction Test	139
6.3.2	Behaviour Anomaly Test	140
6.3.3	Behaviour Sensitivity Test	141
6.4	Tests of Policy Implications	144
6.4.1	Changed Behaviour Prediction Test	144
6.4.2	Policy Sensitivity Test	145
	References	148
	Bibliography	148
7	Scenario Planning and Modelling	149
7.1	Introduction	149
7.2	Scenario Planning and Modelling	150
7.3	Participatory System Dynamics Modelling	151
7.4	Participatory System Dynamics-Based Scenario Planning	154
7.4.1	Simulation	156
7.4.2	Scenario	156
7.5	Steps in Scenario Planning	156
7.6	Policy Planning for Different Development Strategies and Modelling	157
7.7	Policy Planning for Implementation of the Development Strategy and Modelling	157
7.8	Policy Design and Evaluation	157
7.9	Some Examples of Scenario Planning and Modelling	158
	References	161

Part II Cases and Applications

8	Modelling of Boom and Bust of Cocoa Production Systems in Malaysia	165
8.1	Introduction	165
8.2	Dynamic Hypothesis	167
8.3	Causal Loop Diagrams	168
8.4	Stock–Flow Model	168
8.5	Model Validation	172
8.6	Simulation and Policy Analysis	173
8.7	Conclusion	177
	References	177
	Bibliography	178
9	Modelling of Hilsa Fish (<i>Tenulosa ilisha</i>) Population in Bangladesh	179
9.1	Introduction	179
9.2	Dynamic Hypothesis	181
9.3	Causal Loop Diagram	182
9.4	Stock–Flow Diagram	183
9.5	Model Validation	187
9.6	Simulation and Policy Analysis	188
9.7	Conclusions	196
	References	197
	Bibliography	198
10	Modelling of Food Security in Malaysia	199
10.1	Introduction	199
10.2	Dynamic Hypothesis	202
10.3	Causal Loop Diagram	202
10.4	Stock–Flow Diagram	202
10.5	Model Validation	206
10.6	Simulation and Policy Analysis	207
	10.6.1 Subsidies for Agricultural Inputs	208
	10.6.2 Withdrawal of Input Subsidies	209
	10.6.3 Gradual Transition to Bio-fertilisers (50 %)	209
	10.6.4 Gradual Transition to Bio-fertilisers (50 %) and R&D	211
	10.6.5 Gradual Transition to Bio-fertilisers (50 %), R&D and Training and Extension Services	212
	10.6.6 Gradual Transition to Bio-fertilisers (50 %), R&D, Training and Extension Services and Cropping Intensity (150 %)	213
10.7	Conclusions	214
	References	215
	Bibliography	216

11 Modelling of Supply Chain of Rice Milling Systems in Bangladesh	217
11.1 Introduction	217
11.2 Dynamic Hypothesis	220
11.3 Causal Loop Diagram	220
11.4 Stock–Flow Diagram	222
11.4.1 Rice Milling Sector	222
11.4.2 Wholesale Sector	226
11.4.3 Retail Sector	228
11.5 Model Validation	230
11.6 Simulation and Policy Analysis	232
11.7 Conclusion	244
References	245
Bibliography	247
12 Modelling of Solid Waste Management Systems of Dhaka City in Bangladesh	249
12.1 Introduction	249
12.2 Dynamic Hypothesis	252
12.3 Causal Loop Diagram	252
12.4 Stock Flow Diagram	254
12.4.1 Waste Management–Material Flow	257
12.4.2 Waste Management: Composting, Incineration and Landfill	260
12.4.3 Waste Management: Energy Flow and Emissions	262
12.5 Model Validation	264
12.6 Simulation and Policy Analysis	264
12.7 Conclusions	272
References	273
Bibliography	274
Index	275
