

Contents

| | | |
|----------|--|----|
| 1 | Introduction | 1 |
| 1.1 | Background and Significance | 1 |
| 1.2 | Review | 3 |
| 1.2.1 | Shaking Table Test Technology | 3 |
| 1.2.2 | Dynamic Characteristics of Slope | 5 |
| 1.2.3 | Deformation Characteristics and Instability Mechanism | 8 |
| 1.2.4 | Seismic Stability Evaluation Method | 9 |
| 1.2.5 | Prediction Model for Earthquake-Induced Landslide Hazard | 13 |
| 1.3 | Problems | 14 |
| 1.4 | Research Objectives and Content | 15 |
| 2 | Seismic Array Monitoring Results Analysis | 19 |
| 2.1 | General Condition | 19 |
| 2.2 | Monitoring Data of Seismic Array in 5.12 Wenchuan Earthquake | 21 |
| 2.3 | Response Characteristics Analysis | 22 |
| 2.4 | Frequency Spectrum Response Characteristics | 25 |
| 2.4.1 | Fourier Spectrum Along Elevation | 25 |
| 2.4.2 | Seismic Ground Motion Response Spectrum Along Elevation | 28 |
| 2.5 | Brief Summary | 30 |
| 3 | Shaking Table Test of Rock Slopes | 31 |
| 3.1 | Large-Scale Shaking Table Test Design | 32 |
| 3.1.1 | Purpose | 32 |
| 3.1.2 | Installation | 32 |
| 3.1.3 | Similarity System | 32 |
| 3.1.4 | Similar Materials | 38 |
| 3.1.5 | Test Instruments and Monitoring Points Disposition Principle | 40 |

| | | |
|----------|--|------------|
| 3.1.6 | Testing Points Disposition | 43 |
| 3.1.7 | Design and Manufacture | 46 |
| 3.1.8 | Sensors | 51 |
| 3.1.9 | Loading Scheme | 53 |
| 3.1.10 | Data Collecting System | 57 |
| 3.1.11 | Result Record | 57 |
| 3.2 | Result Analysis | 60 |
| 3.2.1 | Influence Factors of Acceleration Amplification Effect | 61 |
| 3.2.2 | Fourier Spectrum and Response Spectrum of Acceleration | 81 |
| 3.3 | Brief Summary | 88 |
| 4 | Numerical Analysis Research | 91 |
| 4.1 | Brief Introduction to GDEM | 91 |
| 4.1.1 | Advantages of GDEM Software | 92 |
| 4.1.2 | Fundamental Principle of GDEM | 93 |
| 4.1.3 | Verification | 94 |
| 4.1.4 | Fundamental Function | 97 |
| 4.1.5 | Modeling Progress and Methods | 98 |
| 4.2 | Key Problems in Numerical Analysis | 98 |
| 4.2.1 | Numerical Analysis Model | 99 |
| 4.2.2 | Material Parameters and Constitutive Model | 101 |
| 4.2.3 | Boundary Conditions | 101 |
| 4.2.4 | Seismic Ground Motion Input Conditions | 102 |
| 4.3 | Verification of Numerical Analysis Results | 104 |
| 4.4 | Seismic Dynamic Response Features | 105 |
| 4.4.1 | Acceleration Amplification Effects | 105 |
| 4.4.2 | Acceleration Fourier Spectrum | 107 |
| 4.4.3 | Acceleration Amplification Effects | 110 |
| 4.5 | Local Topography Effect | 111 |
| 4.5.1 | Key Problems in Numerical Analysis | 112 |
| 4.5.2 | Calculation Results Analysis | 114 |
| 4.6 | Brief Summary | 118 |
| 5 | Theoretical Solutions of Acceleration Amplification of Hill | 121 |
| 5.1 | Formula Derivation | 121 |
| 5.1.1 | General Thinking and Basic Assumption | 122 |
| 5.1.2 | Generalized Analysis Model | 122 |
| 5.1.3 | Derivation Process | 123 |
| 5.1.4 | Time–Frequency Analysis Process | 128 |
| 5.1.5 | Practical Application | 128 |
| 5.2 | Solving Approach | 130 |
| 5.3 | Verification | 130 |
| 5.3.1 | Overview | 130 |
| 5.3.2 | Verification | 131 |

- 5.4 Parameter Analysis 133
 - 5.4.1 Peak Value 133
 - 5.4.2 Frequency 133
 - 5.4.3 Bevel Angles. 135
 - 5.4.4 “Whiplash Effect” 136
- 5.5 Comparative Analysis. 137
 - 5.5.1 Brief Introduction of Some Seismic Design Code. 137
 - 5.5.2 Code for Seismic Design of Buildings
GB50011-2010 138
 - 5.5.3 Specifications for Seismic Design of Hydraulic
Structures DL/5073-2000. 138
 - 5.5.4 Design Specification for Slope of Hydropower
and Water Conservancy Project SL/386-2007 139
 - 5.5.5 Comparative Analysis 139
- 5.6 Brief Summary 141
- 6 Slope Deformation Characteristics and Formation Mechanism 143**
 - 6.1 Brief Introduction 144
 - 6.1.1 Numerical Simulation Method. 145
 - 6.1.2 Numerical Analysis Model 145
 - 6.1.3 Numerical Constitutive Model and Material
Parameters 145
 - 6.1.4 Boundary Conditions. 147
 - 6.2 Deformation Characteristics and Disaster Mechanism. 147
 - 6.2.1 Whole Landslide Process. 147
 - 6.2.2 Landslide Hazard Phenomenon 149
 - 6.2.3 Landslide Mechanism Analysis 151
 - 6.3 Brief Summary 161
- 7 Slope Seismic Stability 163**
 - 7.1 Slope Seismic Stability. 164
 - 7.1.1 General Thinking and Basic Assumption. 164
 - 7.1.2 Generalized Analysis Model 165
 - 7.1.3 Reflective and Transmission Coefficients. 166
 - 7.1.4 Instant Seismic Stability Coefficient 169
 - 7.1.5 Time–Frequency Analysis Process of Seismic Waves 171
 - 7.1.6 Practical Application of Seismic Wave
Time–Frequency Effects 171
 - 7.2 Time–Frequency Analysis Formula Derivation. 174
 - 7.3 Verification. 174
 - 7.3.1 Overview. 175
 - 7.3.2 Gravitational Stress Field. 176
 - 7.3.3 Calculation Results’ Comparison. 176

| | | |
|----------|---|------------|
| 7.4 | Study on Parameters | 179 |
| 7.4.1 | Incident Angle on Transmitted and Reflected Coefficients of the Structural Surface | 180 |
| 7.4.2 | The Influence of Elasticity Modulus of Cover Layer on Transmitted and Reflected Coefficients of the Structural Surface | 182 |
| 7.4.3 | The Influence of Incident Angle on Transmitted and Reflected Coefficients of the Structural Surface | 183 |
| 7.4.4 | The Influence of Elasticity Modulus of Cover Layer on Transmitted and Reflected Coefficients of the Structural Surface | 185 |
| 7.4.5 | The Influence of Elasticity Modulus of Cover Layer on Total Transmitted and Reflected Energy Coefficients of the Structural Surface | 187 |
| 7.5 | Advantage | 188 |
| 7.6 | Brief Summary | 191 |
| 8 | Prediction Model | 193 |
| 8.1 | Field Investigation | 194 |
| 8.2 | Controlling Factors | 195 |
| 8.3 | Analysis of Controlling Factors | 195 |
| 8.3.1 | Correlation Between Landslide Volume V and Horizontal Sliding Distance L and Vertical Sliding Distance H | 196 |
| 8.3.2 | Correlation Between Bevel Angle $\tan\theta$ and Equivalent Friction Coefficient f | 196 |
| 8.3.3 | Seismic Ground Motion Attenuation Model Based on Measured Data of Wenchuan Earthquake | 197 |
| 8.3.4 | Correlation Between PGA and Horizontal Sliding Distance | 199 |
| 8.4 | Prediction Model O | 200 |
| 8.5 | Case Analysis of Donghekou Landslide and Magongwoqian Landslide | 202 |
| 8.6 | Parameters | 204 |
| 8.7 | Brief Summary | 205 |
| | Conclusions and Prospects | 207 |
| | Bibliography | 215 |
