Contents

1 Origin and Background of Circular Economy Development 1
  1.1 China’s National Conditions 2
    1.1.1 China’s Population and Demographic Distribution 3
    1.1.2 A Vulnerable Foundation for Development 10
  1.2 Staged Characteristics of China’s Economic Development
    Since the Reform and Opening-up Initiative, as Well as
    Its Impacts on Resources and the Environment 10
    1.2.1 The Background of Economic Development
      at the Initial Stage of Reform and Opening-up 10
    1.2.2 Characteristics of China’s Economic Development
    1.2.3 Main Features of China’s Economic Development
      from 1996 to 2010 and Its Environmental
      and Resource Impact 14
  1.3 From Environmental Protection to Circular Economy 17

2 The Role of Government and China’s Policy System
  for Circular Economy 21
  2.1 Why Did the Chinese Government Facilitated
    the Circular Economy Development 21
    2.1.1 Free Market Economy in Britain: The First Generation
      of Industrialization Featured by the Difficulty
      in Resource Recycling 21
    2.1.2 Free Market Economy in the United States:
      The Second Generation of Industrialization
      in Which the Government Played a Role 22
    2.1.3 Capitalist Market Economy in Japan: The Third
      Generation of Industrialization Under the Leadership
      of the Government 23

3 The Fundamental Modes and Achievements of China’s Circular Economy Development | 55  |
| 3.1     | Fundamental Modes of China’s Circular Economy Development | 56  |
| 3.1.1   | The Top-Down Dynamic Model and Addressing the Crux | 56  |
| 3.1.2   | To Enable “the Visible Hand” to Cooperate with “the Invisible Hand” | 58  |
| 3.2     | To Build a Model for the Circular Economy-Oriented Practice with Chinese Characteristics | 60  |
| 3.2.1   | To Set up the Mechanisms of Leadership and Coordination at Different Levels | 60  |
| 3.2.2   | To Provide Institutional Guarantee at Different Levels | 61  |
| 3.2.3   | Fiscal Means to Directly Carry Out Circular Economy Pilot Projects | 62  |
| 3.3     | To Set up a Microscopic Circular Economy Model with Chinese Characteristics | 66  |
| 3.3.1   | Microscopic Models of the Circular Economy in Key Industries | 66  |
| 3.3.2   | The Composite and Cross-Industry Circular Economy-Oriented Models in Agriculture | 70  |
| 3.3.3   | Circular Economy-Oriented Models for Industrial Parks | 71  |
| 3.3.4   | Models of Remanufacturing and Resource Recycling | 74  |
# Contents

3.4 Remarkable Achievements Harvested in the Decade

3.4.1 Census of the Whole Society and National Strategic Action

3.4.2 Circular Economy and Technological Innovation

3.4.3 Wastes Recycling

3.4.4 Recycling of Renewable Resources

3.4.5 Efficiency and Benefits of Resource Utilization

4 China’s Steel Industry Transformed by Circular Economy

4.1 Amazing Size and Technological Structure

4.1.1 The “Steel Dream” for the Rejuvenation of the Chinese Nation

4.1.2 An Amazing Superpower in Steel Output

4.1.3 A Museum Showcasing the Technologies Adopted by the Steel Industries from Across the World

4.2 Circular Economy Transforming Steel Plants into “Power Plants”

4.2.1 Importance of Energy Conservation in the Steel Industry

4.2.2 Taking Advantage of Technological Innovations to Reduce Primary Energy Consumption

4.2.3 Recovering Secondary Energy and Building Distributed Generation Assemblies

4.3 Circular Economy Transforming Steel Plants into “Mineral Treasures”

4.3.1 With the Magic Phrase of “Open Sesame”, Wastes Transforming into Resource Treasures

4.3.2 Maximizing the Performance of Ferrous Resources

4.3.3 Steel Enterprises Transforming into “Building Material” Producers

4.3.4 Embarking on a Path Towards Diversified Utilization for Higher Value

4.4 Combination of Water Conservation and Utilization of Reclaimed Water

4.4.1 Giving Top Priority to Water Conservation

4.4.2 Steel Enterprises Transforming into “Reclaimed Water Plants”

5 The Circular Economy-Oriented Practice in the Nonferrous Metal Industry

5.1 The Necessity to Develop Circular Economy in the Nonferrous Metal Industry

5.1.1 Characteristics of the Production in the Nonferrous Metal Industry
5.1.2 Development of China’s Nonferrous Metal Industry 101
5.1.3 Problems Concerning the Environment and Resources for the Nonferrous Metal Industry 103

5.2 Major Measures to Develop the Circular Economy of the Nonferrous Metal Industry 106
5.2.1 Technological Upgrading and Innovations for Reduction in Energy Consumption 106
5.2.2 Enhancing the Comprehensive Utilization and Environment-Friendly Disposal 109
5.2.3 Facilitating the Utilization of Secondary Metals 111
5.2.4 Improving the Policy and Regulation System 113

5.3 Major Achievements in Circular Economy Development in the Nonferrous Metal Industry 115
5.3.1 Steady Increase in Resource Utilization Efficiency 115
5.3.2 Brilliant Achievements in Energy Conservation and Emission Reduction 117
5.3.3 Remarkable Achievements in Secondary Metal Development 119
5.3.4 A Long Way to Go for Circular Economy Development in the Nonferrous Metal Industry 119

6 The Circular Economy-Oriented Practice in the Cement Industry 123
6.1 Soul of China’s Building Material Industry, the Largest Emitter of Greenhouse Gases 123
6.1.1 Soul of China’s Building Material Industry 124
6.1.2 Largest Emitter of Greenhouse Gases 124
6.1.3 Circular Economy Development Within the Industry 126

6.2 Co-processing of the Solid Wastes in the Cement Industry 131
6.2.1 Comprehensive Utilization of Fly Ash 133
6.2.2 Comprehensive Utilization of Blast Furnace Slag 133
6.2.3 Comprehensive Utilization of Converter Slag 134
6.2.4 Comprehensive Carbide Slag Utilization 135
6.2.5 Comprehensive Utilization of Nonferrous Metal Smelting Slag 136
6.2.6 Comprehensive Utilization of Sludge 137
6.2.7 Comprehensive Utilization of Municipal Solid Wastes 138

6.3 Circular Economy-Oriented Technological Innovations in the Cement Industry 139
6.3.1 Circular Economy-Oriented Technologies Await Improvement 139
6.3.2 Accelerating the Efforts for Circular Economy-Oriented Technological Innovations 140

10  The Circular Economy-Oriented Practice in the Food Manufacturing Industry

10.1 Overview of the Industrial Development
10.1.1 Overview of the Development of the Food Industry
10.1.2 Overview of the Development of the Fermentation Industry

10.2 Necessity to Develop the Circular Economy in the Industry

10.3 Major Policies and Measures for Circular Economy Development in the Industry
10.3.1 To Guide Circular Economy Development in the Industry with Policies and Regulations
10.3.2 To Set Industrial Development Goals Through Defining Binding Standards for Cleaner Production and Discharge Reduction of Major Pollutants
10.3.3 To Carry Out Pilot Projects for Circular Economy Development and Bring the Demonstration Effect of Industrial Parks into Full Play
10.3.4 To Promote Technological Innovations, and Enhance Core Competitiveness
10.3.5 To Establish the Mechanism of Environmental Scrutiny, and Strengthen the Guidance for and Supervision on Enterprises

10.4 Achievements of Circular Economy Development in the Industry

10.5 Case Study on Circular Economy Development in the Industry
10.5.1 COFCO Biochemical (AnHui) Co., Ltd.
10.5.2 Luzhou Bio-Chem Technology Ltd

10.6 Future Development of the Circular Economy in the Food Industry
10.6.1 To Improve the Policy and Law System and Increase the Operability of Policies
10.6.2 To Carry Out Industrial Restructuring
10.6.3 To Cement the Building of the Industrial Chain
10.6.4 To Further Improve Technological Capabilities Through Developing the Key Technologies

11  Circular Economy-Oriented Agricultural Practice

11.1 Driving Force for Agricultural Circular Economy Development
11.2 Definition and Features of China’s Agricultural Circular Economy

11.3 Operation of China’s Agricultural Circular Economy
11.4 China’s Policies and Measures to Promote the of Agricultural Circular Economy Development
