1 Introduction to the Philosophical Arguments Underpinning Personalised Education
   Philosophical Thinking ........................................... 1
   The Theoretical Construct: Habermas .......................... 3
   Definitions .......................................................... 8
   Personalised Learning ............................................ 8
   Personalised Learning in Higher Education Through
     E-mediated Instruction ......................................... 11
   E-mediated Instruction .......................................... 12
   E-mediated Instruction in Higher Education ................... 14
   Provocations ....................................................... 15
   References .......................................................... 15

2 A Brief History of E-mediated Education ........................ 17
   A Brief History .................................................... 17
   Programmed Learning ............................................ 18
   Beyond Distance Education ..................................... 19
   Massive Open Online Courses (MOOCs) ....................... 21
   Connectivism ....................................................... 21
   Current Developments ............................................ 23
   Conclusion .......................................................... 23
   Provocations ....................................................... 24
   References .......................................................... 24

3 Personalised Learning, Pedagogy, and E-mediated Tools ....... 27
   Major Areas of Debate ............................................ 27
   Digital Disruption to Teaching and Learning in Higher Education .......................... 28
     Looking to the Past ........................................... 28
     Looking at the Present ....................................... 29
     Looking to the Future ....................................... 31
7 From Policy to Practice—Personalisation and the Higher Education Sector ................................................................. 95
From Policy to Practice ................................................................. 95
The International Policy Agenda: Defining and Understanding the Technical Rules ................................................................. 96
Neoliberalism and the Imperative of Globalisation .......................... 97
Standardisation and the Audit Culture ........................................ 98
Personalisation Policies ............................................................... 100
Provocations ............................................................... 102
References ............................................................... 105

8 Experiencing E-mediated Personalised Learning in Practice—A Teacher’s Insight ................................................................. 107
From One Stakeholder’s Point of View ........................................ 107
Technical Rule 1: The Interests of Money and Power Must Be Met First ................................................................. 108
Technical Rule 2: A Specific and Interventionist State Policy Regime and the Decline of Labour Power ........................................ 109
Technical Rule 3: Quality Defined as How Much Can Be Assessed Summatively in Order to Gauge How Close to Excellence the Student, Lecturer, University, State, and Nation Have Come ........................................ 110
Technical Rule 5: A New Class of Technical Experts .................... 114
Technical Rule 6: Students Achieving to the Highest Standard Possible ................................................................. 115
Technical Rule 7: Education that Is Targeted, Documented, and Caters for Diversity, but Is not Individualised ................. 116
A Happy Ending and Technical Rule 8: A Personalised Environment that Emanates from the Learner and not the Instructor ........................................ 118
Provocations ............................................................... 120
References ............................................................... 120

9 E-mediated Approaches to Personalising Inter-professional Learning in the Health Sector ................................................................. 123
The Importance of Health Education ........................................ 124
IPL in Health Education .......................................................... 125
IPL—The Concept ........................................................... 127
IPL and Personalised Learning—Connections and Boundaries .......... 129
The WHO Framework ........................................................... 132
10 Evidence in Relation to the Effectiveness of E-mediated Personalised Education

What Is Effective? ......................................... 145
Research Reviews ........................................... 147
Recent Studies ............................................. 147
Further Research .......................................... 148
Provocations ............................................... 148
Final Word ............................................... 149
References ................................................. 150

Index .................................................................. 153
Theorising Personalised Education
Electronically Mediated Higher Education
Garrick, B.; Pendergast, D.; Geelan, D.
2017, XXI, 155 p. 15 illus., Hardcover
ISBN: 978-981-10-2698-0
