## Contents

1 First Order Quasilinear Hyperbolic Systems ........................................ 1  
1.1 1-D First Order Quasilinear Hyperbolic Systems .......................... 1  
1.2 Characteristic Form of Hyperbolic System .............................. 3  
1.3 Reducible Quasilinear Hyperbolic System. Riemann Invariants .... 4  
1.4 Saint-Venant System for Unsteady Flows on a Single  
    Open Canal ........................................................................ 5  
1.5 Semi-global $C^1$ Solutions to the Mixed Initial-Boundary  
    Value Problem ................................................................... 7  
1.6 Exchanging the Role of $t$ and $x$ ........................................ 10  
1.7 Uniqueness of $C^1$ Solution to the One-Sided Mixed  
    Initial-Boundary Value Problem ....................................... 11  

2 Quasilinear Wave Equations ........................................................... 15  
2.1 1-D Quasilinear Wave Equations ........................................... 15  
2.2 Semi-global $C^2$ Solutions to the Mixed Initial-Boundary  
    Value Problem ................................................................... 16  
2.3 Uniqueness of $C^2$ Solution to the One-Sided Mixed  
    Initial-Boundary Value Problem ....................................... 19  

3 Semi-global Piecewise Classical Solutions on a Tree-Like  
    Network ............................................................................... 23  
3.1 Introduction ........................................................................... 23  
3.2 Semi-global Piecewise $C^1$ Solutions to 1-D First Order  
    Quasilinear Hyperbolic Systems on a Tree-Like Network ....... 23  
3.3 Semi-global Piecewise $C^2$ Solutions to 1-D Quasilinear  
    Wave Equations on a Tree-Like Network ............................. 27  

4 Exact Boundary Controllability of Nodal Profile  
    for 1-D First Order Quasilinear Hyperbolic Systems ............. 31  
4.1 Introduction ........................................................................... 31  
4.2 Definitions and Main Results ............................................. 32  
4.3 Proof of Theorem 4.1 ......................................................... 35
4.4 Proof of Theorem 4.2 ........................................ 37
4.5 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Single Open Canal .... 40
4.6 Remarks .................................................. 46

5 Exact Boundary Controllability of Nodal Profile for 1-D First Order Quasilinear Hyperbolic Systems on a Tree-Like Network ................................................................. 47
5.1 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Star-Like Network of Open Canals (Case 1) ...................................................... 48
5.2 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Star-Like Network of Open Canals (Case 2) ...................................................... 53
5.3 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Star-Like Network of Open Canals (Case 3) ...................................................... 55
5.4 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Star-Like Network of Open Canals (Case 4) ...................................................... 58
5.5 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Star-Like Network of Open Canals (Case 5) ...................................................... 62
5.6 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Tree-Like Network of Open Canals ................................................................. 64
5.7 Exact Boundary Controllability of Nodal Profile for Saint-Venant System on a Tree-Like Network of Open Canals (Continued) ...................................................... 71
5.8 Remarks ...................................................... 73

6 Exact Boundary Controllability of Nodal Profile for 1-D Quasilinear Wave Equations .................................................. 75
6.1 Introduction .................................................. 75
6.2 Definitions and Main Results .................................. 75
6.3 Proof of Theorem 6.1 ......................................... 78
6.4 Proof of Theorem 6.2 ......................................... 80
6.5 Remarks ...................................................... 82

7 Exact Boundary Controllability of Nodal Profile for 1-D Quasilinear Wave Equations on a Planar Tree-Like Network of Strings .................................................. 83
7.1 Introduction .................................................. 83
7.2 Exact Boundary Controllability of Nodal Profile for 1-D Quasilinear Wave Equations on a Star-Like Network of Strings .................................................. 83
