

Contents

1 Basic Description of Soil and Soil Reinforcement	1
1.1 Introduction	1
1.2 Soil and Its Phases	1
1.3 Soil Properties and Core Principles of Soil Mechanics	5
1.4 Soil Reinforcement	12
1.5 Fibre-Reinforced Soil Engineering	17
References	20
2 Basic Description of Fibre-Reinforced Soil	23
2.1 Introduction	23
2.2 Fibres	24
2.3 Phases in a Fibre-Reinforced Soil Mass	32
2.4 Soil Reinforced with Continuous Fibres and Multioriented Inclusions	38
References	42
3 Engineering Behaviour of Fibre-Reinforced Soil	45
3.1 Introduction	45
3.2 Factors Affecting the Engineering Behaviour	46
3.3 Shear Strength	47
3.3.1 Observations in Direct Shear Tests	47
3.3.2 Observations in Triaxial Tests	54
3.4 Unconfined Compressive Strength	65
3.5 Compaction Behaviour	77
3.6 Permeability and Compressibility	80
3.7 California Bearing Ratio	86
3.8 Load-Carrying Capacity	92
3.9 Other Properties	98
References	106

4	Soil Reinforcing Mechanisms and Models	111
4.1	Introduction	111
4.2	Basic Soil Reinforcing Mechanisms	111
4.3	Basic Models of Fibre-Reinforced Soils	116
4.3.1	Waldron Model	116
4.3.2	Gray and Ohashi (GO) Model	117
4.3.3	Maher and Gray (MG) Model	120
4.3.4	Ranjan, Vasan and Charan (RVC) Model	121
4.3.5	Zornberg Model	123
4.3.6	Shukla, Sivakugan and Singh (SSS) Model	126
4.4	Other Models and Numerical Studies	134
	References	143
5	Applications of Fibre-Reinforced Soil	145
5.1	Introduction	145
5.2	Field Applications	145
5.3	Analysis and Design Concepts	148
5.4	Field Application Experience and Guidelines	161
5.5	Scope of Research	174
	References	179
	Index	181

Fundamentals of Fibre-Reinforced Soil Engineering

Kumar Shukla, S.

2017, XI, 181 p. 61 illus., 13 illus. in color., Hardcover

ISBN: 978-981-10-3061-1
