

Contents

1	Introduction	1
1.1	General Introduction	1
1.2	Electrolyte Solution	6
1.3	Structure of Electric Double Layer	8
1.4	Electrokinetic Transport	12
1.5	Theory of the Stern Layer	17
1.5.1	Gouy-Stern Double-Layer Model with Specific Adsorption of Ions	17
1.5.2	Shear Plane and Saturation of Electrokinetic Charge	19
1.5.3	Continuum Model Using Nonuniform Permittivity and Viscosity	21
1.6	Basis of Polymer Physics	23
1.6.1	Gyration Radius of a Polymer	23
1.6.2	Continuum Model of Polymer Solution	25
1.6.3	Polymer at an Interface	28
1.6.4	Charged Polymers	29
	References	30
2	Linear Electro-Osmosis of Charged and Uncharged Polymer Solutions	33
2.1	Mean-Field Equations for Concentrations, Electrostatic Potential and Flow	33
2.2	Electrically Neutral Polymer Solution with Chemically Repulsive Surfaces	37
2.3	Polyelectrolyte Solution with Chemically Repulsive Surfaces	39
2.3.1	Relationship Between Electro-Osmosis and Static Properties	40
2.3.2	Relationship Between Electro-Osmosis and Dynamical Properties	43

2.4	Summary and Remarks	46
	Appendix 2	47
2.A	Local Equilibrium Conditions for the Components.	47
2.B	Scaling Behaviors in Polyelectrolyte Solutions.	48
	References	48
3	Nonlinear Electro-Osmosis of Uncharged Polymer Solutions with Low Ionic Strength	51
3.1	Toy Model.	51
3.2	Model for Simulation.	53
3.3	Results of Simulation.	56
3.4	Kinetic Theory	60
3.5	Summary and Remarks	64
	Appendix 3	65
3.A	Derivation of the Velocity for Brownian Dynamics Simulation	65
3.B	Approximated Expressions for Kinetic Theory.	66
	References	69
4	Summary and Outlook	71
4.1	Conclusion.	71
4.2	Remarks on Electro-Osmosis of Polymer Solutions.	72
	References	73
	Curriculum Vitae	75

Electro-Osmosis of Polymer Solutions

Linear and Nonlinear Behavior

Uematsu, Y.

2017, XII, 76 p. 34 illus., 18 illus. in color., Hardcover

ISBN: 978-981-10-3423-7
