

Contents

1	Weather and Climate	1
1.1	Universal Dynamics of a System	1
1.2	Similarity and Evolution	4
1.3	Dynamical Definitions of Climate and Anomalies	13
1.4	Descriptions of Weather and Climate	15
1.5	Weather and Climatic Anomalies as Well as Their Predictions	17
1.6	Decomposition of Temporal Climatology and Anomaly	21
	References	30
2	Wind and General Circulation	31
2.1	Diurnal-Cycle General Circulation	31
2.2	Seasonal-Cycle General Circulation	33
2.3	History of Trade Circulation	35
2.4	Modern General Circulation	39
2.5	The Arctic Cell and the Four-Cell Model	41
2.6	Eddy Heat Flux and Eddy Momentum Flux	51
2.7	Global Eight Meridional Cells	55
2.8	Hemispheric Height and Vorticity	59
2.9	An Aqua Control Experiment	61
	References	66
3	Spatial Patterns and Time Scales of Climatic State	69
3.1	Seasonal Evolution of Zonally Averaged Variables	70
3.2	Zonally Averaged Vertical–Meridional Structure	77
3.3	Zonal Asymmetric Vertical Structure	79
3.4	Horizontal Patterns of Climatic Variable Departure	86
3.5	Seasonal Variation of Climatic Variable Departure	93
3.6	Temporal Decomposition of Climatic Field and Annual Cycle Systems	101

3.7	Semiannual and Biweekly Cycle Systems.	106
3.8	Identifying Three Period Bands	121
3.9	Annual and Semiannual Asymmetric Systems	126
	References.	151
4	Global Monsoon	153
4.1	Wind Seasonality and Symmetric Dry–Wet Alteration	153
4.2	Cross-Equatorial Flow and Asymmetric Seasonal Dry–Wet Alteration	158
4.3	Identifying Global Monsoon Domain	165
4.4	Global Seasonal Precipitation Division	177
4.5	Seasonal Circulation Systems	186
4.6	Global Monsoon Division and Trend	191
4.7	Outer Edge Active Zones of the Global Monsoon	193
4.8	East Asian Monsoon Outer Edge Active Zone	196
4.9	Millennium Monsoon Dry–Wet Modes.	200
	References.	209
5	Waves and Vortices.	215
5.1	Lower Stratosphere Decomposition.	215
5.2	Upper Tropospheric Decomposition	222
5.3	Lower Tropospheric Decomposition	225
5.4	Other Level and Vertical Decompositions.	231
5.5	Vertical Sections of Total and Anomalous Variables	231
5.6	Regional Total- and Anomaly-Based Synoptic Charts	239
5.7	Examples of Model Prediction	244
	References.	249
6	Regional Convective Events	251
6.1	Site and Regional Rainfall Events in China	251
6.2	Comparison Between Total and Anomalous Fields.	257
6.3	Normalized Anomaly and Raw Anomaly	269
6.4	Heavy Rains and Anomalous Circulation Patterns	280
6.4.1	Three Anomalous Circulation Patterns in South China	281
6.4.2	Two Anomalous Circulation Patterns along the Yangtze River Valley	289
6.4.3	Anomalous Vortex Patterns in North China and Northeast China	292
6.5	Moist Divergence and Moist Vorticity	298
6.6	Nonconservative Thermodynamic Parameters.	316
6.7	Tornado-Producing Anomalous Systems in the Central US	326
6.8	Tornado-Producing Anomalous Systems in the Eastern China	334

6.9	Model Prediction Ability	339
	References.	343
7	Heat Waves and Cold Events	347
7.1	Definitions of Heat Waves and Cold Events.	347
7.2	Summer Moving-Type Heat Waves	352
7.3	Heat Waves in Model Predictions.	365
7.4	Spring and Autumn Low Temperature Events	369
7.5	Positive Height Anomalies and Warm Events.	386
7.6	Negative Height Anomalies and Cold Events.	398
7.7	Summer Standing-Type Heat Events	407
	References.	420
8	Unusual Tropical Cyclones	425
8.1	Separating the Typhoon Vortex from Its Surrounding Flow	425
8.2	Evaluating Typhoon Intensification.	437
8.3	The Generalized Beta-Advection Model (GBAM)	445
8.4	GBAM Predictions on Typhoon Megi (2010).	450
8.5	More Applications of the GBAM.	456
8.6	Hurricane Sandy (2012) and Left-Turning Prediction	474
8.7	Reexamining the Binary Interaction of Tropical Cyclones	492
8.8	Ideal Binary Interaction of Tropical Cyclones	504
	References.	517
9	Circulation and Climatic Anomalies	523
9.1	Meridional Circulation Anomalies and Arctic Sea-Ice Events.	523
9.2	Seasonal Variation of the Arctic and Polar Cells	530
9.3	Meridional Cell Anomalies and Climatic Anomalous Patterns.	535
9.4	Annual Mean Meridional Cell Trends and the Arctic Climatic Anomalies	551
9.5	Boreal Winter–Spring Arctic Amplification and Meridional Cells	562
9.6	Regional Relationship Between Arctic Sea Ice and Atmospheric Anomalies	571
9.7	The South Asian High and Eurasian Summer Climatic Anomalies.	585
9.8	The Western Pacific Subtropical High and Precipitation Pattern	604
	References.	618
10	Low-Frequency Oscillations	625
10.1	Maximum Anomalies of Atmospheric Variables.	625
10.2	Low-Frequency Standing Oscillations in the Northern Hemisphere.	629

10.3	Low-Frequency Standing Oscillations in the Southern Hemisphere.	636
10.4	Low-Frequency Standing Oscillations in the Tropics	639
10.5	The Madden-Julian Oscillation and Height Anomalies	644
10.6	Eastward and Westward Propagations of Tropical Oscillations.	663
	References.	674
	Data Sources	677
	References	681
	Index	683

Temporal Climatology and Anomalous Weather Analysis

Qian, W.

2017, XVI, 687 p. 489 illus., Hardcover

ISBN: 978-981-10-3640-8
