1	Introduction	1
1.1	Rationale	1
1.2	Research Objectives	3
1.3	Thesis Organisation	4
	References	5
2	Literature Review	9
2.1	Mechanical Reprocessing of Polypropylene Waste	9
2.1.1	Degradation and Crystallisation Behaviours of Reprocessing PP Waste	10
2.1.2	Melt Blending	12
2.1.3	Filler Reinforcement	14
2.1.4	Mechanochemistry	15
2.2	Use of Macro Plastic Fibres in Concrete	16
2.2.1	Preparation and Properties of Macro Plastic Fibres	18
2.2.2	Macro Plastic Fibre Reinforced Concrete	20
2.2.3	Cost and Environmental Benefits of Using Macro Plastic Fibres	28
2.2.4	Applications of Macro Plastic Fibre Reinforced Concrete	29
2.3	Characterisation of Toughness and Post-cracking Behaviour of Fibre Reinforced Concrete	31
2.3.1	Four-Point Flexural Tests on the Unnotched Beams	32
2.3.2	Three-Point Flexural Tests on the Notched Beams	36
2.3.3	Flexural Tests on the Round Panel	38
2.4	Life Cycle Assessment	40
2.5	Conclusions	42
	References	43

3	Production and Characterisation of the Physical and Mechanical Properties of Recycled PP Fibers	51
3.1	Fibre Production and Measurement	51
3.1.1	Raw Materials for Fibre Production	51
3.1.2	Preparation of PP Fibres	52
3.1.3	Tensile Strength of PP Fibres	53
3.1.4	Fourier Transform Infrared Spectroscopy	53
3.1.5	Differential Scanning Calorimeter	54
3.1.6	Wide-Angle X-ray Scattering	55
3.2	Mechanical Properties of PP Fibres	57
3.3	Molecular Orientation by FTIR	58
3.4	Crystal Structure and Crystallinity by DSC	59
3.5	Crystallinity by WAXS	65
3.6	Conclusions	66
