

Contents

1	Introduction	1
	References.	3
2	Tests of Lorentz Invariance	5
2.1	Test Theories	5
2.1.1	Robertson Framework	6
2.1.2	Mansouri–Sexl Framework	8
2.1.3	Standard Model Extension	9
2.1.4	Spherical Harmonic Decomposition of Anisotropy	10
2.2	Previous Tests of Lorentz Invariance	12
2.2.1	Michelson–Morley Type Experiments.	12
2.2.2	Kennedy–Thorndike Type Experiments.	16
2.2.3	Ives–Stilwell Type Experiments	17
2.3	Purpose of Our Experiment	22
2.4	Summary of This Chapter.	23
	References.	24
3	Optical Ring Cavity	27
3.1	Experimental Principle	27
3.1.1	Principle	27
3.1.2	Double-Pass Configuration	29
3.1.3	Advantages Compared with Previous Experiments	30
3.2	Sensitivity Goal	31
3.3	Noise Sources and Requirements	32
3.3.1	Shot Noise	32
3.3.2	Laser Intensity Noise	34
3.3.3	Laser Frequency Noise	35
3.3.4	Noise from Sagnac Effect	36
3.3.5	Other Noises	37

3.4	Summary of This Chapter.	43
	References.	44
4	Experimental Setup.	45
4.1	Overview	45
4.2	Optical Ring Cavity	46
4.2.1	Design of the Optical Ring Cavity	46
4.2.2	Optical Configuration	47
4.2.3	Frequency Servo and Calibration of the Signal	50
4.2.4	Sensitivity of the Stationary Ring Cavity	51
4.3	Turntable	52
4.3.1	Setup of the Turntable.	53
4.3.2	Rotational Speed Fluctuation.	54
4.3.3	Sensitivity During Rotations	55
4.4	Data Acquisition System	57
4.4.1	Data Taking	57
4.4.2	Remote Controlling System	58
4.5	Observational Data	59
4.6	Summary of This Chapter.	61
	References.	62
5	Data Analysis.	63
5.1	Method	63
5.1.1	Sun Centered Celestial Equatorial Frame	64
5.1.2	Expression of the Lorentz Violation Signal.	65
5.1.3	Extraction of the Spherical Coefficients from the Signal	67
5.2	Results	69
5.3	Results in the Framework of the SME	70
5.4	Systematic Uncertainties.	76
5.5	Summary of This Chapter.	77
	References.	78
6	Conclusion	79
6.1	Summary	79
6.2	Discussions.	80
6.3	Future Prospects	81
6.4	Conclusion	82
	References.	83
7	Appendix	85
7.1	Standard Model Extension	85
7.1.1	Overview of the SME Electrodynamics	85
7.1.2	Data Analysis in the SME.	88

- 7.2 Feedback Control 91
 - 7.2.1 Openloop Transfer Function 91
 - 7.2.2 Feedback Control and Noise 93
- 7.3 Optical Cavities and Hänsch–Couillaud Method. 95
 - 7.3.1 Optical Cavities. 96
 - 7.3.2 Waveplates 100
 - 7.3.3 The Hänsch–Couillaud Method. 101
- 7.4 Laser Frequency Actuation Efficiency Measurement. 106
 - 7.4.1 Asymmetric Michelson Interferometer. 107
 - 7.4.2 Measurement Result 108
- 7.5 Photos of the Apparatus 109

Tests of Lorentz Invariance with an Optical Ring Cavity

Michimura, Y.

2017, XVIII, 115 p. 47 illus., 45 illus. in color., Hardcover

ISBN: 978-981-10-3739-9
