

Contents

1	Introduction	1
2	Linear Models	9
2.1	Simple Linear Regression Model	9
2.2	Multiple Regression Model	10
2.3	Estimation of Parameters	11
2.3.1	Method of Least Squares	12
2.3.2	Maximum Likelihood Estimation	15
2.4	Tests	16
2.5	Example	19
3	Exponential Family of Distributions	23
3.1	Exponential Family and Sufficiency	24
3.2	Some Important Properties	28
4	Generalized Linear Models	31
4.1	Introduction	31
4.2	Exponential Family and GLM	32
4.3	Expected Value and Variance	34
4.4	Components of a GLM	35
4.5	Multinomial Response Model	38
4.6	Estimating Equations	40
4.7	Deviance	43
4.8	Examples	47
5	Covariate-Dependent Markov Models	51
5.1	Introduction	51
5.2	First Order Markov Model	52
5.3	Conditional Model for Second Order Markov Chain with Covariate Dependence	54
5.4	Covariate Dependent Model for Markov Chain of Order r	57

5.5	Tests for the Model	58
5.6	Examples	60
6	Modeling Bivariate Binary Data	67
6.1	Introduction	67
6.2	Bivariate Bernoulli Distribution	68
6.3	Bivariate Binary Model with Covariate Dependence.	69
	6.3.1 Covariate-Dependent Model	70
	6.3.2 Likelihood Function and Estimating Equations	71
6.4	Test for Dependence in Bivariate Binary Outcomes	72
	6.4.1 Measure of Dependence	72
	6.4.2 Test for the Model	73
	6.4.3 Test for Dependence	75
6.5	Generalized Bivariate Bernoulli Model.	76
	6.5.1 The Bivariate Bernoulli Model	77
	6.5.2 Estimating Equations.	79
	6.5.3 Tests	81
6.6	Some Alternative Binary Repeated Measures Models.	82
6.7	Examples	84
7	Bivariate Geometric Model.	87
7.1	Introduction	87
7.2	Univariate Geometric Distribution	88
7.3	Bivariate Geometric Distribution: Marginal and Conditional Models	88
7.4	Bivariate Geometric Distribution: Joint Model	91
7.5	Examples	93
8	Models for Bivariate Count Data:	
	Bivariate Poisson Distribution	97
8.1	Introduction	97
8.2	The Poisson–Poisson Distribution.	98
8.3	Bivariate GLM for Poisson–Poisson.	99
	8.3.1 Model and Estimation	99
	8.3.2 Overdispersion in Count Data	100
	8.3.3 Tests for Goodness of Fit	101
	8.3.4 Simple Tests for Overdispersion With or Without Covariate Dependence.	102
8.4	Zero-Truncated Bivariate Poisson.	103
	8.4.1 Zero-Truncated Poisson Distribution	104
	8.4.2 A Generalized Zero-Truncated BVP Linear Model	105
	8.4.3 Test for the Model	107
	8.4.4 Deviance and Goodness of Fit	107

- 8.5 Right-Truncated Bivariate Poisson Model 108
 - 8.5.1 Bivariate Right-Truncated Poisson–Poisson Model 108
 - 8.5.2 Predicted Probabilities 110
 - 8.5.3 Test for Goodness of Fit 112
- 8.6 Double Poisson Distribution 114
 - 8.6.1 Double Poisson Model 114
 - 8.6.2 Bivariate Double Poisson Model 118
- 8.7 Applications 121
- 9 Bivariate Negative Binomial and Multinomial Models 125**
 - 9.1 Introduction 125
 - 9.2 Review of GLM for Multinomial 126
 - 9.3 Bivariate Multinomial 128
 - 9.4 Tests for Comparison of Models 131
 - 9.5 Negative Multinomial Distribution and Bivariate GLM 133
 - 9.5.1 GLM for Negative Multinomial 134
 - 9.6 Application of Negative Multinomial Model 137
- 10 Bivariate Exponential Model 139**
 - 10.1 Introduction 139
 - 10.2 Bivariate Exponential Distributions 139
 - 10.3 Bivariate Exponential Generalized Linear Model 142
 - 10.4 Bivariate Exponential GLM Proposed
by Iwasaki and Tsubaki 146
 - 10.5 Example 148
- 11 Quasi-Likelihood Methods 151**
 - 11.1 Introduction 151
 - 11.2 Likelihood Function and GLM 152
 - 11.3 Quasi-likelihood Functions 153
 - 11.4 Estimation of Parameters 155
 - 11.5 Examples 158
- 12 Generalized Estimating Equation 161**
 - 12.1 Introduction 161
 - 12.2 Background 161
 - 12.3 Estimation of Parameters 163
 - 12.4 Steps in a GEE: Estimation and Test 164
 - 12.5 Examples 166
- 13 Generalized Linear Mixed Models 169**
 - 13.1 Introduction 169
 - 13.2 Generalized Linear Mixed Model 169
 - 13.3 Identity Link Function 170
 - 13.4 Logit Link Function 170
 - 13.5 Log Link Function 171

- 13.6 Multinomial Data 173
- 13.7 Examples 175
- 14 Generalized Multivariate Models 177**
 - 14.1 Introduction 177
 - 14.2 Multivariate Poisson Distribution 179
 - 14.3 Multivariate Negative Binomial Distribution. 181
 - 14.4 Multivariate Geometric Distribution 182
 - 14.5 Multivariate Normal Distribution 184
 - 14.6 Examples 187
- 15 Multistate and Multistage Models 191**
 - 15.1 Introduction 191
 - 15.2 Some Basic Concepts 192
 - 15.3 Censoring: Construction of Likelihood Function 196
 - 15.4 Proportional Hazards Model 197
 - 15.5 Competing Risk Proportional Hazards Model. 199
 - 15.6 Multistate Hazards Model 200
 - 15.7 Multistage Hazards Model 203
 - 15.8 Examples 207
- 16 Analysing Data Using R and SAS 213**
 - 16.1 Description 213
- References 235**
- Subject Index. 249**

Analysis of Repeated Measures Data

Islam, M.A.; CHOWDHURY, R.

2017, XIX, 250 p. 6 illus., Hardcover

ISBN: 978-981-10-3793-1
