

Contents

1 Virtual Prototyping of Embedded Systems: Speed and Accuracy Tradeoffs	1
Vania Joloboff and Andreas Gerstlauer	
2 Model-Based Design and Automated Validation of ARINC653 Architectures Using the AADL	33
Jérôme Hugues and Julien Delange	
3 Formal Semantics of Behavior Specifications in the Architecture Analysis and Design Language Standard	53
Loïc Besnard, Thierry Gautier, Paul Le Guernic, Clément Guy, Jean-Pierre Talpin, Brian Larson and Etienne Borde	
4 MARTE for CPS and CPSoS	81
Frédéric Mallet, Eugenio Villar and Fernando Herrera	
5 Combined Model Checking and Testing Create Confidence—A Case on Commercial Automotive Operating System	109
Toshiaki Aoki, Makoto Satoh, Mitsuhiro Tani, Kenro Yatake and Tomoji Kishi	
6 Formal Methods for Aerospace Systems	133
Marco Bozzano, Harold Brintjes, Alessandro Cimatti, Joost-Pieter Katoen, Thomas Noll and Stefano Tonetta
