Contents

1 EAF in Global Steel Production; Energy and Productivity
Problems .......................................................... 1
  1.1 Production of Steel from Scrap Is EAF’s Mission .......... 1
  1.2 Melting a Scrap as a Key Process of the Heat ............ 3
  1.3 Unjustified High Electrical Energy Consumption ....... 3
  1.4 Problems of Ultra-High Power (UHP) EAFs with Regard
      to Energy .................................................. 4
  1.5 High Productivity or Low Costs? .......................... 5
References ....................................................... 6

2 Analysis of Technologies and Designs of the EAF as an Aggregate
for Heating and Melting of Scrap .............................. 7
  2.1 Melting a Scrap by Electric Arcs. Function of Hot Heel .. 7
    2.1.1 Single Scrap Charging ............................... 8
    2.1.2 Telescoping Shell ................................... 9
  2.2 Heating a Scrap by Burners in the Furnace Freeboard .... 9
    2.2.1 Specifics of Furnace Scrap Hampering Its Heating ... 9
    2.2.2 Stationary Burners and Jet Modules ................. 10
    2.2.3 Rotary Burners with Changing the Flame Direction .. 14
    2.2.4 Two-Stage Scrap Melting. Industrial Testing
           of the Process ....................................... 19
    2.2.5 Twin-Shell EAFs .................................... 22
  2.3 EAF with Preheating a Scrap by Off-Gases and Melting
       of Preheated Scrap in Liquid Metal ..................... 25
    2.3.1 Conveyor Furnaces of Consteel-Type ................. 25
    2.3.2 Shaft Furnaces with Fingers Retaining Scrap ....... 29
    2.3.3 Shaft Furnaces with Pushers of the COSS-Type ...... 35
2.4 Factors Hindering Wide Spread of Shaft Furnaces ............. 37
   2.4.1 Calculation of the Maximum Values of the Power
   of the Heat Flow of Off-Gases and Temperature
   of Scrap Heating by These Gases in the Shaft ............. 38
References. .................................................................. 39

3 Experimental Data on Melting a Scrap in Liquid Metal Required
   for Calculation of This Process ................................. 41
   3.1 Features of Scrap Melting Process ......................... 41
   3.2 Studies of the Melting Process by the Method of Immersion of
   Samples in a Liquid Metal. Analysis of the Results ............. 43
   3.2.1 Melting of Single Samples of Scrap with a Solidified
   Layer and Without Solidifying .............................. 43
   3.2.2 Co-melting of Multiple Samples ..................... 48
   3.2.3 Porosity of Charging Zone and Bulk Density of Scrap . 50
References. .................................................................. 50

4 Calculations of Scrap Melting Process in Liquid Metal ...... 51
   4.1 Scrap Melting Time ..................................... 51
   4.2 Adaptation of Experimental Data Obtained by the Method
   of Melting Samples to Real Conditions of Scrap Melting .... 52
   4.2.1 Equivalent Scrap .................................. 52
   4.2.2 Correction Coefficients $K_p$, $K_L$, $K_{ts}$ and $K_a$ .... 53
   4.3 Calculation Method of Scrap Melting Time in Liquid Metal .... 55
   4.3.1 General Characteristic of the Method ............. 55
   4.3.2 Examples of Calculations of Scrap Melting Time .... 55
   4.3.3 Specific Scrap Melting Rate ..................... 58
References. .................................................................. 59

5 Increasing Scrap Melting Rate in Liquid Metal by Means
   of Oxygen Bath Blowing ....................................... 61
   5.1 Preliminaries ........................................ 61
   5.2 Tuyeres with Evaporation Cooling Embedded in the Lining .... 63
   5.3 Roof Water-Cooled Tuyeres for Bath Blowing at Slag-Metal
   Interface .................................................. 66
   5.3.1 Thermal Operation of Tuyeres: Heat Flows,
   Temperatures. ........................................... 66
   5.3.2 Roof Tuyere with Jet Cooling: Design,
   Basic Parameters ....................................... 73
References. .......................................................... 78
Fuel Arc Furnace (FAF) for Effective Scrap Melting
From EAF to FAF
Toulouevski, Y.N.; Zinurov, I.Y.
2017, IX, 94 p. 23 illus., Softcover
ISBN: 978-981-10-5884-4
