## Contents

### Part I Methodology

1. **Protein Studies by High-Pressure NMR**
   Kazuyuki Akasaka
   
   3

2. **Isotope-Aided Methods for Biological NMR Spectroscopy: Past, Present, and Future**
   Masatsune Kainosho, Yohei Miyanoiri and Mitsuhiro Takeda
   
   37

3. **Advances in NMR Data Acquisition and Processing for Protein Structure Determination**
   Teppei Ikeya and Yutaka Ito
   
   63

4. **Advances in High-Field DNP Methods**
   Yoh Matsuki and Toshimichi Fujiwara
   
   91

5. **Photoirradiation and Microwave Irradiation NMR Spectroscopy**
   Akira Naito, Yoshiteru Makino, Yugo Tasei and Izuru Kawamura
   
   135

6. **Solid-State NMR Under Ultrafast MAS Rate of 40–120 kHz**
   Yusuke Nishiyama
   
   171

7. **Elucidating Functional Dynamics by \( R_1p \) and \( R_2 \) Relaxation Dispersion NMR Spectroscopy**
   Erik Walinda and Kenji Sugase
   
   197

8. **Structural Study of Proteins by Paramagnetic Lanthanide Probe Methods**
   Tomohide Saio and Fuyuhiko Inagaki
   
   227

9. **Structure Determination of Membrane Peptides and Proteins by Solid-State NMR**
   Izuru Kawamura, Kazushi Norisada and Akira Naito
   
   253
Part II  Application to Life Science and Materials Science

10 NMR Studies on Silk Materials ........................................ 297
   Tetsuo Asakura and Yugo Tasei

11 NMR Studies on Polymer Materials ................................. 313
   Atsushi Asano

12 Solid-State $^2$H NMR Studies of Molecular Motion in Functional
   Materials ................................................................. 341
   Motohiro Mizuno

13 NMR Spectral Observations of the Gases in
   Polymer Materials .................................................... 365
   Hiroaki Yoshimizu

14 NMR Studies on Natural Product—Stereochemical
   Determination and Conformational Analysis in Solution
   and in Membrane .................................................. 383
   Nobuaki Matsumori and Michio Murata

15 Technical Basis for Nuclear Magnetic Resonance Approach for
   Glycoproteins .......................................................... 415
   Koichi Kato, Saeko Yanaka and Hirokazu Yagi

16 NMR Studies on RNA .................................................. 439
   Taiichi Sakamoto, Maina Otsu and Gota Kawai

17 NMR Analysis of Molecular Complexity .......................... 461
   Jun Kikuchi

18 NMR of Paramagnetic Compounds .................................. 491
   Yasuhiko Yamamoto and Tomokazu Shibata

19 NMR of Quadrupole Nuclei in Organic Compounds ............. 519
   Kazuhiko Yamada

20 Quadrupole Nuclei in Inorganic Materials ........................ 545
   Toshikazu Takahashi

21 Protein–Ligand Interactions Studied by NMR ..................... 579
   Hidekazu Hiroaki and Daisuke Kohda

22 Protein Structure and Dynamics Determination by Residual
   Anisotropic Spin Interactions ..................................... 601
   Shin-ichi Tate
Experimental Approaches of NMR Spectroscopy
Methodology and Application to Life Science and
Materials Science
Naito, A. (Ed.)
2018, XII, 636 p. 278 illus., 168 illus. in color.,
