Contents

Network Systems and Communication Security

CbdA: Cloud Computing Based DMIS on ANEKA ........................................... 3
   Shweta Meena, Rahul Johari, John Sushant Sundharam,
   and Kalpana Gupta

Design of Task Scheduling Model for Cloud Applications
in Multi Cloud Environment .......................................................... 11
   P.K. Suri and Sunita Rani

Analysis of Epidemic Outbreak in Delhi Using Social Media Data ........... 25
   Sweta Swain and K.R. Seeja

Erasure-Coded Network Backup System (ECNBS) ................................... 35
   Aatish Chiniah, Jellina Aishwarta Dev Dhora,
   and Chaahana Juhinee Sandooram

Morphological Analysis and Synthesis of Manipuri Verbs
Using Xerox Finite-State Tools ..................................................... 44
   Ksh. Krishna B. Singha

Bi-objective Cross-Layer Design Using Different Optimization
Methods in Multi-flow Ad-Hoc Networks ...................................... 57
   Ridhima Mehta and D.K. Lobiyal

Power Analysis of a Network Using DECAP Algorithm by Varying
Network Sizes and Users ............................................................ 68
   Anup Bhola and C.K. Jha

Green Communication: An Emerging Telecommunication Technology-Its
Research Challenges, Techniques and Applications .......................... 76
   Sasi Kiran Sajja and Padmavathy N.

A 1.25 THz High Gain Hybrid Circuit with CNT Model Performance
Optimization for Radar Sensors Application ................................... 85
   Sandeep Kumar, Van-Ha Nguyen, Won-young Jung, and Hanjung Song

Image Based Password Composition Using Inverse Document Frequency . . . 95
   K.P. Arun and Arun Mishra

Dynamic Threshold-Based Dynamic Resource Allocation Using Multiple
VM Migration for Cloud Computing Systems .................................. 106
   Sonam Seth and Nipur Singh
3D Weighted Centroid Localization Algorithm for Wireless Sensor Network Using Teaching Learning Based Optimization ............... 117
*Gaurav Sharma and Ashok Kumar*

An Approach to Build a Sentiment Analyzer: A Survey .................. 128
*Singh Dharmendra, Bhatia Akshay, and Singh Ashvinder*

Malicious PDF Files Detection Using Structural and Javascript Based Features ..................................................... 137
*Sonal Dabral, Amit Agarwal, Manish Mahajan, and Sachin Kumar*

A System Architecture for Mapping Application Data into Complex Graph .................................................. 148
*Sonal Tuteja and Rajeev Kumar*

Ontology-Driven Shopping Cart and Its Comparative Analysis .......... 156
*Aditya Vardhan and Amrita Chaturvedi*

*Habib ur Rehman, Mohammed Nazir, and Khurram Mustafa*

Ring Segmented and Block Analysis Based Multi-feature Evaluation Model for Contrast Balancing .................. 181
*Kapil Juneja*

A Scheme of Visual Object Tracking for Human Activity Recognition in Social Media Analytics ....................... 194
*Naresh Kumar*

DNA Based Cryptography ................................................................. 205
*Archana Gahlaut, Amit Bharti, Yash Dogra, and Puneet Singh*

A Noise Robust VDD Composed PCA-LDA Model for Face Recognition .................................................. 216
*Kapil Juneja*

**Software Engineering**

Extending AHP_GORE_PSR by Generating Different Patterns of Pairwise Comparison Matrix. .......................... 233
*Mohd. Sadiq and Arashiya Afrin*

Analysis of Errors in Safety Critical Embedded System Software in Aerial Vehicle ........................................ 246
*Lakshmi K.V.N.S. and Sanjeev Kumar*
Method to Resolve Software Product Line Errors ........................................ 258
  Megha, Arun Negi, and Karamjit Kaur

Test Case Prioritization Based on Dissimilarity Clustering
Using Historical Data Analysis ............................................................. 269

Algorithm and High Performance Computing

A Fast GPU Based Implementation of Optimal Binary Search Tree
Using Dynamic Programming ............................................................. 285
  Mohsin Altaf Wani and Manzoor Ahmad

A Hybridized Evolutionary Algorithm for Bi-objective Bi-dimensional
Bin-packing Problem ........................................................................ 296
  Neeraj Pathak and Rajeev Kumar

Protein Features Identification for Machine Learning-Based Prediction
of Protein-Protein Interactions ............................................................ 305
  Khalid Raza

Load Balancing Task Scheduling Based on Variants of Genetic Algorithms:
Review Paper .................................................................................... 318
  Ayushi Harkawat, Shilpa Kumari, Poorva Pharkya, and Deepak Garg

Deep Learning Model Schemes to Address the Scrutability and In-Memory
Purchase Issues in Recommender System ........................................ 326
  J. Sharon Moses and L.D. Dhinesh Babu

A Survey of Design Techniques for Conversational Agents ..................... 336
  Kiran Ramesh, Surya Ravishankaran, Abhishek Joshi,
  and K. Chandrasekaran

Fault Tolerant Control, Artificial Intelligence and Predictive Analytics
for Aerospace Systems: An Overview ............................................... 351
  Krishna Dev Kumar and Venkatesh Muthusamy

An Optimal Multi-view Ensemble Learning for High Dimensional
Data Classification Using Constrained Particle Swarm Optimization .... 363
  Vipin Kumar and Sonajharia Minz

Identifying Metaphors Using Fuzzy Conceptual Features ....................... 379
  Sunny Rai, Shampa Chakraverty, and Devendra K. Tayal

Author Index ....................................................................................... 387
Information, Communication and Computing Technology
Second International Conference, ICICCT 2017, New Delhi, India, May 13, 2017, Revised Selected Papers
2017, XIII, 388 p. 163 illus., Softcover
ISBN: 978-981-10-6543-9
