Contents

1 The International Comparison and Trend Analysis of the Development of MOOCs in Higher Education ............... 1
  1.1 Introduction: ICT, OER, and Higher Education Internationalization ............................................. 1
  1.2 MOOC Challenges and Current Status ..................... 2
  1.3 Research Background and Methodology ................... 3
  1.4 Emerging Patterns of International Collaboration Fostered by MOOCs ........................................... 4
  1.5 MOOCs and Complexity .................................... 6
  1.6 Conclusions .......................................... 7
References ............................................. 7

2 Emergence and Development of MOOCs .............................. 11
  2.1 MOOCs and Their Evolution ................................ 11
    2.1.1 Definition of MOOCs ................................ 12
    2.1.2 Evolution of MOOCs ................................ 13
  2.2 International Development of MOOCs ....................... 14
    2.2.1 History of Development ............................. 14
    2.2.2 Current Status .................................... 16
  2.3 Development of MOOCs in China .......................... 17
    2.3.1 History of Development ............................. 17
    2.3.2 Current Status .................................... 18
  2.4 Controversies About MOOCs ............................... 21
    2.4.1 Pros ........................................... 21
    2.4.2 Cons ........................................... 22
References ............................................. 24
### Innovative and Revolutionary Potential of MOOCs

#### 3.1 Innovations of cMOOCs

- **3.1.1 Views of Knowledge and Learning in Connectivism**
- **3.1.2 Innovation of Teaching Service Model Propelled by cMOOCs**
- **3.1.3 Innovation of Teaching Model Achieved by cMOOCs**

#### 3.2 Innovations of xMOOCs

- **3.2.1 Innovation of Teaching Organization Model Propelled by xMOOCs**
- **3.2.2 Innovation of Teaching Model Achieved by xMOOCs**

#### 3.3 Potential of MOOCs to Make a Change in Higher Education

### Overview of Research on Chinese MOOCs

#### 4.1 Platforms and Courses

- **4.2 Colleges and Universities**

### Construction of MOOC Platforms in China

#### 5.1 Overview of Construction of MOOC Platforms in China

#### 5.2 Observations on Major Platforms

- **5.2.1 Ewant**
- **5.2.2 Sharecourse**
- **5.2.3 TopU**
- **5.2.4 Kaikeba**
- **5.2.5 Railway School**
- **5.2.6 NetEase Cloud Classroom**
- **5.2.7 Zhihuishu**
- **5.2.8 China University MOOC (Icourse163.Org)**
- **5.2.9 MOOC China**
- **5.2.10 MOOC Alliance for Adult Universities**
- **5.2.11 CNMOOC**
- **5.2.12 Chinese MOOCs**
- **5.2.13 XuetangX.com**
- **5.2.14 UOOC**

#### 5.3 Platform Construction Analysis

- **5.3.1 Comparison of Basic Properties**
- **5.3.2 Comparison of Resources and Teaching**
- **5.3.3 Comparison of Technological Functions**
6.9.5 Learning Attitudes ........................................ 117
6.9.6 Comprehensive Examination on Learning Qualities ........................................ 117
References .................................................. 118

7 Basic Information of MOOCs in China ........................................ 119
7.1 Development Status of MOOCs in China ........................................ 119
  7.1.1 Course Introduction ........................................ 119
  7.1.2 Course Construction ........................................ 122
  7.1.3 Course Application ........................................ 131
  7.1.4 Course Management ........................................ 136
7.2 Organization Forms of MOOCs in China ........................................ 142
  7.2.1 Course Construction: Relying on Domestic Self-constructed Courses, Led by Colleges/ Universities, and Assisted by Educational Institutions and Enterprises ........................................ 143
  7.2.2 Learning Content: Most on Science and Engineering, Together with Construction of Multidisciplinary Courses ........................................ 145
  7.2.3 Teaching Model: Mainly in the Form of Lectures ........................................ 146
  7.2.4 Course Management: Specific Access ........................................ 146
7.3 Summary .................................................. 147
References .................................................. 147

8 Design Model for MOOCs in China ........................................ 149
8.1 Pedagogics of MOOCs in China ........................................ 149
8.2 Design Mode .................................................. 150
  8.2.1 Learning Path Analysis ........................................ 150
  8.2.2 Learning Objective Analysis ........................................ 152
  8.2.3 Learning Evaluation Analysis ........................................ 153
  8.2.4 Learning Activities Analysis ........................................ 154
  8.2.5 Learning Resources Analysis ........................................ 155
8.3 Design of Micro-courses of MOOCs in China ........................................ 156
  8.3.1 Number of Micro-courses ........................................ 156
  8.3.2 Length of Micro-courses ........................................ 158
  8.3.3 Interaction in Micro-courses ........................................ 158
  8.3.4 Chinese Subtitles ........................................ 158
  8.3.5 Organizational Form of Micro-courses ........................................ 160
8.4 Suggestions on Design of MOOCs in China ........................................ 160
  8.4.1 Constructing Learning Paths with Multiple Strategies ........................................ 161
  8.4.2 Writing SMART Learning Objectives ........................................ 162
  8.4.3 Adopting Diversified Evaluation Methods ........................................ 163
9 Instructional Interaction of MOOCs in China

9.1 Overview of Interaction in the Courses

9.2 Investigation of Instructional Interaction in Learners

9.2.1 Learner–Learner Interaction

9.2.2 Learner–Teacher Interaction

9.3 Instructional Interaction in Various Courses

9.3.1 Instructional Interaction in Courses of Different Levels

9.3.2 Instructional Interaction in Courses of Different Learning Models

9.3.3 Instructional Interaction in Courses of Different Video Types

9.3.4 Instructional Interaction in Courses with Different Forms of Learning Support

9.3.5 Instructional Interaction in Courses with Different Learning Evaluations

9.4 Analysis of Instructional Interaction in MOOCs

9.4.1 Cluster Analysis of Learning and Teaching Interactions

9.4.2 Discussion of Situations of Learning and Teaching Interaction

9.4.3 Suggestions on Construction of MOOCs from the Perspective of Instructional Interaction

10 Evaluation Models of MOOCs in China

10.1 Overview of Evaluation in the Courses

10.2 Evaluation in Various Courses

10.2.1 Evaluation of Courses of Different Levels

10.2.2 Evaluation of Courses with Different Limitations of Access

10.2.3 Evaluation of Courses with Different Teaching Models

10.2.4 Evaluation of Courses with Different Evaluators

10.2.5 Evaluation of Courses with Different Certificates

10.3 Analysis of Evaluation Models of MOOCs

10.3.1 Cluster Analysis of Evaluation Models

10.3.2 Discussions on Evaluation Models
11 Learning Support of MOOCs in China

11.1 Overview of Learning Support

11.2 Learning Support for Courses of Various Types

11.2.1 Learning Support for Courses of Different Levels

11.2.2 Learning Support for Courses of Different Teaching Models

11.2.3 Learning Support for Courses with Different Evaluation Methods

11.2.4 Learning Support for Courses with Different Certificates

11.2.5 Learning Support for Courses with Different Participating Evaluator

11.3 Analysis of Learning Support in MOOCs

11.3.1 Cluster Analysis of Learning Support

11.3.2 Discussions on Learning Support

11.3.3 Suggestions for Construction of MOOCs Based on Learning Support Analysis

11.3.4 Pay Attention to the Timeliness and Effectiveness of Instructional Interaction

12 Introduction, Construction, Usage, and Management of MOOCs in China

12.1 Current Situation and Progress Made in Educational Informationization

12.1.1 Degree of Importance Attached to Informationization by Universities

12.1.2 Main Forms Used by Universities to Implement Informationization

12.1.3 Barriers for Informationization in Universities

12.1.4 Major Driving Forces for Online Higher Education

12.1.5 Changes in Teaching and Learning Facilitated by Educational Informationization

12.2 Development Status of MOOCs in Universities

12.2.1 Cognition of Universities on MOOCs

12.2.2 Construction of MOOCs

12.2.3 Introduction of MOOCs

12.2.4 Construction of MOOCs

12.2.5 Management of MOOCs in Universities

12.2.6 Attitudes of Relevant Groups in Universities Toward MOOCs

12.2.7 Usage of MOOCs in Universities
13 Certificate Authentication and Credit System of MOOCs in China ............................................. 261
13.1 Charges and Certificate Granting ............................................. 261
13.1.1 Fee Charging ............................................. 261
13.1.2 Certificate Granting ............................................. 262
13.1.3 Micro-Major ............................................. 265
13.1.4 Discussion ............................................. 267
13.2 MOOC Credit Recognition of Higher Learning Institutions .......... 268
13.3 Organizational Forms of MOOC Credit Recognition ............... 270
13.3.1 University-Led Credit Recognition for School Students ............ 270
13.3.2 Inter-school Mutual Recognition of Credit Established by Collegiate Consortiums ............ 272
13.3.3 Credit Mutual Recognition of Regional Universities Under the Coordination of Educational Administrations ............ 272
13.3.4 Credit Banks Run by Open Universities ............ 274
13.3.5 Discussion ............................................. 275

14 Conclusions of Construction and Development of MOOCs in China ............................................. 277
14.1 Ten Characteristics of Construction and Development of MOOCs in China ............................................. 277
14.1.1 Great Support from the Government, Active Participation from Enterprises ............ 277
14.1.2 Breaking Through the Traditional Positioning of MOOCs, Activating the Overall Transformation in Online Education with the Help of MOOCs ............ 278
14.1.3 Diversified Organization Modes, Construction of Proprietary Platforms, and Course Systems of China ............ 279
14.1.4 Systematic Innovations, Promotion of Credit Mutual Recognition Through Development of MOOCs ............ 279
14.1.5 Abundant Choices in MOOCs that Basically Cover All the Disciplines ............ 280
14.1.6 Old Fashioned Teaching Model, In-depth Learning Needs to Be Promoted ............ 281
14.1.7 Strong Learning Willingness of Learners, but Accompanied with Low Completion Rate and Generally, Low Level of Learning Qualities ............ 281
14.1.8 Overall Weakness in Learning Support Services, Lacking in Real-Time and Individualized Support .................................. 282
14.1.9 Efforts Have Been Made by Universities to Explore New Models and Organization Modes by Means of MOOCs, but More Work Still Needs to Be Done in Reforms of Higher Education ................ 283
14.1.10 Collaborative Innovation and Modes of Sustainable Development Preliminarily Established ........... 283

14.2 Eight Challenges Faced by Construction and Development of MOOCs in China ................................ 284
14.2.1 Supports with Self-Adaptive, Individualized Learning Services .................. 284
14.2.2 Exploration of Business Models .................. 284
14.2.3 Innovations in Technological Application ........ 285
14.2.4 Breakthroughs in “Internet+” Model .............. 285
14.2.5 Innovation in Online Learning Theories .......... 286
14.2.6 Improvement of Autonomous Learning Ability of Learners .................... 286
14.2.7 Improvements Needed in Systems of Quality Assurance and Credit Certification .......................... 287
14.2.8 IP Issues of MOOCs to Be Solved .................. 287

14.3 Summary ........................................ 288
References ............................................ 288
