Designing of Algorithm for Image Analysis in Genotyping	
Microarray Data Analysis	1
D. Kiranmai, G. Lavanya Devi and M. Murali Krishna	
1 Introduction	1
2 Methodology	3
2.1 Microarray Image Processing	3
2.2 Gridding	5
3 Results and Discussions	6
3.1 Programmed Threshold Selection	6
3.2 Division	8
3.3 ELB	9
4 Conclusion	11
References	12
Sentimental Analysis on Cognitive Data Using R	15
Ramachandra Rao Kurada and Karteeka Pavan Kanadam	
1 Introduction	16
2 Motivation Towards Sentiment Analysis	16
3 Model Formulation and Evaluation	18
3.1 Methodical Approach for Commissioning Sentiment Analysis	18
3.2 Naïve Bayes	19
3.3 Inverted Index	20
3.4 Term Frequency—Inverse Document Frequency (Tf-Idf)	20
3.5 Classifier Evaluation Metrics	20
4 Results and Discussion	21
4.1 Dataset 1 (Global Warming)	21
4.2 Step Wise Implementation of Dataset 1 (Global Warming) Using R	23

4.3	Dataset 2 (Judge Emotion About Products)	25
4.4	Dataset 3 (Airline Twitter Sentiment)	27
4.5	Dataset 4 (Drug Relation Database)	28
4.6	Dataset 5 (Do Chemical Contribute to a Disease)	30
5	Conclusion	34
	References	34
	A Study on Proteins Associated with MODY Using	
	Computational Biology	37
	Y. Nihitha, G. Lavanya Devi and V. Jaya Vani	
1	Introduction	37
2	Materials and Methods	38
2.1	Data Collection	38
2.2	Gene Mapping	38
2.3	Multiple Sequence Alignment (MSA)	38
2.4	Protein-Protein Network and Pathway Design of MODY Sequences	39
2.5	Identifying Molecular Interactions	39
3	Results and Discussion	39
4	Conclusion	46
	References	46
	Encode, Decode and Diabetes	47
	G.R. Sridhar	
1	Introduction	47
1.1	Biology as Information Science	48
1.2	Heritability of Diabetes and the HGP	48
2	Encode	49
2.1	Goals	49
2.2	Available Data	50
2.3	Use of Data	50
2.4	Data Access to Encode	50
2.5	Criticism	50
2.6	Encode and Diabetes	50
2.7	Role of Biobanks	51
3	deCODE: The Past as Future	51
3.1	Scientific Output from Decode Genomics	52
3.2	Loss of Function Mutations in Humans	52
3.3	Ethics, deCODE and Genomics	53
4	Conclusion	54
	References	54

Automatic Region Segmentation and Variance Based Multimodal Medical Image Fusion	57
Ch. Hima Bindu and K. Satya Prasad	
1 Introduction	57
2 Region Based Image Fusion	58
3 Proposed Work	59
3.1 Fusion Process	59
4 Experimental Results	60
4.1 Performance Evaluation	60
5 Conclusion	62
References	63
Modelling and Docking Studies of Alpha Glucosidase Involved in Diabetes	65
Vamsi Krishna and T. Raghava Rao	
1 Introduction	65
2 Materials and Methodology	67
2.1 Collection of Sequences	67
2.2 Era of 3-D Structure Utilizing Homology Demonstrating	67
2.3 Assessment and Validation of 3-D Structure	68
2.4 Dynamic Site Identification	68
2.5 Virtual Screening of TFG Phyto-mixes Through Atomic Docking	69
2.6 Gold Score Wellness Work	69
3 Results and Discussion	69
3.1 Homology Modeling of α -Glucosidase	69
3.2 Approval of Created α -Glucosidase	71
3.3 Docking of Inhibitors with α -Glucosidase	72
4 Conclusion	74
References	75
Predicting NTPase Activity For Protein Belonging To <i>E. Coli</i>	77
P. Bharat Siva Varma and Yesu Babu Adimulam	
1 Introduction	77
2 Materials and Methods	78
2.1 Selection of Hypothetical Protein	78
2.2 Similarity Search	78
2.3 Sequence Analysis	79
3 Results and Discussion	79
4 Conclusion	80
References	81

Insilico Binding Studies of Resveratrol for Protective Effects in Neurodegeneration Using Glutamate Receptor 3B as Target Model	83
C.S. Reddy Nallagouni and K. Pratap Reddy	
1 Introduction	83
2 Methodology	84
2.1 Collection of Protein Sequence	84
2.2 3D Model	84
2.3 Template Identification and Search	85
2.4 Sub-atomic Dynamics	85
2.5 Structure Validation	85
2.6 Active Site Identification	86
2.7 Docking Studies	86
2.8 Docking with the Active Site of Glutamate Receptor Iontropic NMDA 3B	86
3 Results and Discussion	87
3.1 Homology Modeling of Glutamate Receptor Iontropic NMDA 3B	87
3.2 Space SELECTION	87
3.3 Layout SELECTION	87
3.4 Impact	88
3.5 Template Selection Using BLAST	88
3.6 Succession ALIGNMENT	89
4 Homology Modeling	89
4.1 Approval of Glutamate Receptor Iontropic NMDA 3B Domain	92
4.2 Dynamic Site Identification	92
5 Docking Studies	93
6 Conclusion	95
References	95
Rough Set Theory Based Missing Value Imputation	97
M. Sujatha, G. Lavanya Devi, K. Srinivasa Rao and N. Ramesh	
1 Introduction	97
2 Data Preprocessing Tasks	99
3 Literature Survey	99
3.1 What Is Missing Value Imputation?	99
3.2 MVI with Mean	100
3.3 MVI with Most Common Attribute Value	100
3.4 MVI with Concept Most Common Attribute Value	100
3.5 MVI Through Case Deletion or Ignore Missing	100
3.6 MVI with K-Nearest Neighbor (K-NN)	100
3.7 MVI with Fuzzy K-Means Clustering	101

4	Missing Value Imputation Through Rough Set Theory	101
4.1	Rough Set Concepts for Missing Value Imputation	101
4.2	Proposed Algorithm for Imputation	101
4.3	Walkthrough Examples for RSMVI	102
5	Experimental Results	104
6	Conclusions	105
