## Contents

1 Overview .......................................................... 1  
  1.1 An Overview of Value Maintenance Management .... 1  
  1.2 Objectives of the Book ...................................... 3  
  1.3 General Organisation of the Book ......................... 4  
  1.4 Overview of Chapters ....................................... 5  

2 An Overview of the Construction Industry .................. 9  
  2.1 The Malaysian Construction Industry .................... 10  
  2.2 The Value of Maintenance Sub-sector ..................... 21  
  2.3 Conclusion and Future Outlook  
          of the Construction Industry ..................... 27  
References .......................................................... 31  

3 Maintenance of Academic Buildings .......................... 33  
  3.1 Introduction ................................................. 33  
  3.2 An Overview of Malaysian Education System .......... 34  
      3.2.1 Roles of University in National Development .... 37  
      3.2.2 Academic Building as a Factor of Production .... 38  
      3.2.3 Roles of Maintenance in Building Performance ... 39  
      3.2.4 What Is the Scope of Building Maintenance? ... 41  
  3.3 Issues in the Present Maintenance Practices .......... 43  
  3.4 Steps to Develop the Value Maintenance Management .. 44  
  3.5 Significance of a Fresh Look ............................. 47  
  3.6 Summary and Observations ................................. 47  
References .......................................................... 48  

4 Malaysian Education System and University Buildings .... 51  
  4.1 Introduction ................................................. 51  
  4.2 Malaysia: An Overview ..................................... 52  
  4.3 Malaysian National Educational Systems ................. 52  
  4.4 National Education Philosophy ............................ 53
5 Building Maintenance Processes, Principles, Procedures, Practices and Strategies .................. 79
5.1 Introduction .................................................. 79
5.2 Ontology and Epistemology of Maintenance .................................................. 80
5.3 Analysis of Factors Leading to Maintenance .............................................. 82
  5.3.1 Poor Design ............................................. 82
  5.3.2 Poor Workmanship ....................................... 83
  5.3.3 Defective Materials and Components ....................................... 84
  5.3.4 Usage and Age ........................................... 84
  5.3.5 Climatic and Environmental Factor ...................................... 85
  5.3.6 Nature of Users ........................................... 86
5.4 Types of Maintenance ............................................. 86
  5.4.1 Preventive Maintenance ....................................... 86
  5.4.2 Corrective Maintenance ...................................... 87
  5.4.3 Predictive Maintenance ....................................... 88
  5.4.4 Proactive Maintenance ........................................ 88
5.5 Condition Survey .................................................. 90
  5.5.1 Condition-based Maintenance ...................................... 91
5.6 Performance-based Maintenance .................................................. 92
5.7 Building Defects .................................................. 92
5.8 Repair and Methods of Cost Forecasting ........................................... 94
5.9 Description of a Mathematical Relationship for Maintenance ....................... 95
5.10 Maintenance Policy .................................................. 96

6.10 Questionnaire for Building Users
6.10.1 Criteria that Enhance User Satisfaction
6.10.2 Defects in Buildings
6.10.3 Method of Administering Questionnaires on the Users
6.11 The Analytical Hierarchy Process (AHP) Survey
6.12 Grounded Theory
6.13 Method of Validating Value Maintenance Management Model
6.14 Summary
References

7 Analysis and Findings
7.1 Introduction
7.2 Summary of the Questionnaires from the Maintenance Organisations
7.2.1 Characteristics of the Respondents
7.2.2 Background Information
7.2.3 Analysis of Criteria Influencing Maintenance Management of Buildings
7.2.4 Criteria of the User Value System: Providers’ Perspectives
7.2.5 Analysis of Defects in the Building: The Providers’ Perspectives
7.3 Users’ Perspectives
7.3.1 Characteristics of the Buildings’ Users
7.3.2 Analysis of the Criteria in the User Value System
7.3.3 Analysis of Building Defects: Users’ Perspectives
7.4 Mathematical Model for Building Maintenance
7.4.1 Development of Hierarchy Model
7.4.2 Model Validity
7.5 Summary
References

8 Discussing the Findings
8.1 Introduction
8.2 Discussion on the Respondent Profile and Background Information
8.3 Discussion on the Criteria that Influence Maintenance Management
8.4 Discussion on Criteria of User Value System
8.5 Discussion on Defects in the Buildings
8.6 Discussion on AHP Model
8.7 Summary

9 Elements of the Proposed Value Maintenance Management Model—“Harmonising It All Altogether”!

9.1 Introduction ................................................. 259
9.2 Design Strategy for the Validation .......................... 260
9.3 Model Development Process ................................. 261
9.4 Overview of the Demography of Participants .......... 262
9.5 The VMMM .................................................. 263
  9.5.1 Maintenance Management of Planning .......... 265
  9.5.2 Maintenance Organisation ............................ 279
  9.5.3 Maintenance Control .................................. 283
  9.5.4 Maintenance Directing ................................ 284
  9.5.5 Maintenance Management of Implementation .. 288
9.6 Summary .................................................... 291
References ......................................................... 292

10 Sustainability Maintenance Initiatives .................... 293
10.1 Introduction .................................................. 293
10.2 Sustainable Housing Maintenance Management Model .. 294
  10.2.1 Introduction .......................................... 295
  10.2.2 Management: An Overview .......................... 297
  10.2.3 Maintenance: An Overview .......................... 297
  10.2.4 Housing as a Sustainable Development’s Driver .. 298
  10.2.5 Towards Sustainable Housing: Malaysia’s Case ... 299
  10.2.6 Sustainable Housing Maintenance Management .. 301
  10.2.7 Conclusions ............................................ 304
10.3 Green Campus ............................................. 305
  10.3.1 Introduction .......................................... 305
  10.3.2 Theoretical Framework and Background .......... 306
  10.3.3 Green Design and Construction Without
  Green Maintenance? ...................................... 308
  10.3.4 Existing Building and Green Maintenance
  Initiatives ................................................. 309
  10.3.5 Green Maintenance of University Buildings .. 310
  10.3.6 Conclusion ............................................ 313
References ......................................................... 314

11 Conclusions and Recommendations .......................... 317
11.1 Introduction .................................................. 317
11.2 Features of the VMMM .................................... 319
11.3 Recommendations .......................................... 319
11.4 General Summary .......................................... 320
Appendix ........................................................................... 321
Nomenclatures: Concepts and Definitions ......................... 323
