## Contents

1 Nanoscale Structure of Biomass ............................................................ 1  
Shi-You Ding  

2 Depolymerization of Cellulosic Biomass Catalyzed by Activated Carbons................................................................. 15  
Hirokazu Kobayashi, Mizuho Yabushita, and Atsushi Fukuoka  

3 Advances in the Conversion of Short-Chain Carbohydrates: A Mechanistic Insight ................................................................. 27  
Rik De Clercq, Michiel Dusselier, and Bert F. Sels  

4 Differentiation of the Coordination Chemistry of Metal Chlorides in Catalytic Conversion of Glucose in Ionic Liquids .................. 57  
Huixiang Li and Z. Conrad Zhang  

5 Base-Catalyzed Reactions in Biomass Conversion: Reaction Mechanisms and Catalyst Deactivation ............................... 87  
Laura Faba, Eva Díaz, and Salvador Ordóñez  

6 Progress in the Development of Mesoporous Solid Acid and Base Catalysts for Converting Carbohydrates into Platform Chemicals ................................................................. 123  
Zhijun Tai, Adam F. Lee, and Karen Wilson  

7 Catalytic Oxidation Pathways for the Production of Carboxylic Acids from Biomass ................................................................. 171  
Lisha Yang, Ji Su, Xiaokun Yang, and Hongfei Lin
8  New Reaction Schemes for the Production of Biomass-Based Chemicals Created by Selective Catalytic Hydrogenolysis: Catalysts with Noble Metal and Tungsten ............................................ 203
Yoshinao Nakagawa, Masazumi Tamura, and Keichi Tomishige

9  Mechanism and Kinetic Analysis of the Hydrogenolysis of Cellulose to Polyols ................................................................. 227
Mingyuan Zheng, Aiqin Wang, Jifeng Pang, Ning Li, and Tao Zhang
http://www.springer.com/978-981-287-687-4

Reaction Pathways and Mechanisms in Thermocatalytic Biomass Conversion I
Cellulose Structure, Depolymerization and Conversion by Heterogeneous Catalysts
Schlaf, M.; Zhang, Z. (Eds.)
2016, X, 260 p., Hardcover
ISBN: 978-981-287-687-4
