SN COMPUTER SCIENCE

Welcoming submissions from all areas of Computer Science

Editors-in-Chief: Erol Gelenbe, Umapada Pal

- Rapid publication & high global visibility
- Expert peer review by a global editorial board
- Free submission and no color or page charges
- Open access publishing option
- Article-level metrics to track the impact of your work
- All articles freely available to read until the end of 2020

Submit online!

SN Computer Science

SN Computer Science is a broad-based, peer reviewed journal that publishes original research in all the disciplines of computer science including various interdisciplinary aspects.

SN Computer Science publishes original research, as well as relevant hardware, and/or software architectures, survey and review articles. All papers are evaluated on the basis of scientific content. Submissions are first screened for research and publication ethics prior to peer review.

Editors-in-Chief
Erol Gelenbe, (FACM, FIEEE, FRSS, FIET), Institute of Theoretical and Applied Informatics, the Polish Academy of Sciences, Poland
Umapada Pal, (FIAPR), Indian Statistical Institute, Kolkata, India

Advisory Board
Rama Chellappa, Department of Electrical and Computer Engineering, University of Maryland, USA
Anthony Ephremides, Electrical and Computer Engineering, Institute for Systems Research, University of Maryland, USA
Carlo Ghezzi, Dipartimento di Elettronica, Informazione e Bioingegneria, Politecnico di Milano, Italy
Dwijesh Kumar Dutta Majumder, Indian Statistical Institute (ISI) and CSIR, India
Giovanni De Micheli, Institute of Electrical Engineering, EPFL, Switzerland
Yoshihiko Nakamura, Department of Mechano-informatics, University of Tokyo, Japan
Harold Vincent Poor, Department of Electrical Engineering, Princeton University, USA
Sartaj Sahni, Computer and Information Sciences and Engineering, University of Florida, Gainesville, USA

Be part of the journey! We offer
- **Partnerships**: With an endeavor to be a journal of, for, and by the community, the journal has a unique feature of ‘Partnerships’. In this, we are inviting selected partners (Departments, Labs, Centers, Institutes and even Universities) to join hands and have their own peer reviewed space. This means having ‘Partner Editors’; planning and publishing peer reviewed Journal Issues without being under the obligation to run full-fledged time bound issues.
- **A journal first approach for conferences**: To be able to provide an exciting option to the Computer Science community of having either a peer reviewed ‘Journal-track’ in their conferences, or a peer reviewed ‘Journal associated with the conference’. SN Computer Science will consider both options from established and upcoming conferences.
