

## Instructions for Authors

### Manuscript Submission

The book series accepts edited volumes and authored monographs.

In case of an edited volume, chapters are usually solicited by the respective volume editor(s). All chapters get reviewed (editor review) and should be submitted to the volume editor.

Manuscripts are checked for plagiarism.

### Manuscript Preparation Guidelines

Please follow our standard Manuscript guidelines for English books and the Key style points. The documents can be downloaded at: <https://www.springer.com/gp/authors-editors/book-authors-editors/your-publication-journey/manuscript-preparation>

Special manuscript guidelines for this series:

- **Length:** The length of the contribution will be set and discussed with the editors (average is 10-20 printed pages). For the purpose of converting printed to manuscript pages, a printed page contains ca. 3600 characters (with spaces) or 550 words of text not including reaction schemes and illustrations.
- **Structure:** The manuscripts should follow a specific structure. Please use this internal structure while writing your chapter:

- ✓ Chapter title
- ✓ Author(s) name(s), affiliations, email addresses, corresponding authors
- ✓ Abstract (consisting of 10-15 lines summarizing the content)
- ✓ Keywords (5-10)
- ✓ List of abbreviations
- ✓ Introduction
- ✓ Main part (choose headings frequently)
- ✓ Conclusion
- ✓ Acknowledgement
- ✓ Compliance with Ethical Standards
- ✓ References

Please use this structure to compose your contribution since it will ensure homogeneity throughout the project. You are free to add further subheadings within the main headers provided but the hierarchical category of subheadings should not go further than two levels.

- **Authorship:** Please include the name of all chapter authors in the correct order with their affiliations in the manuscript and mark who is to be the corresponding author. We are not able to accept a change of authorship after a contribution has been submitted.
- **Citations:** By name of cited author and year of publication, at the appropriate location in the sentence.
- **Reference List:** In the reference list, please follow Springer Basic Style. Personal information is not accepted in the reference list as we generate a direct link to the cited reference via Crossref. Please do not put commas between names and initials, and do not put periods after initials or abbreviations. Always use the standard abbreviation of a journal's name according to the ISSN List of Title Word Abbreviations, see <http://www.issn.org/2-22661-LTWA->

[online.php](#). In preparing the reference listing, be sure to include complete bibliographic information.

### Ethical Requirements

Authors have to follow our Publication Ethics which can be found [here](#).

Authors need to disclose any conflict of interest they might have, funding sources and confirm that experiments described in the chapter involving humans or animals were conducted by respecting the corresponding ethical guidelines and that informed consent was obtained in case humans were involved. In case no humans or animals were involved in the study, this has to be stated as well (please see below).

The statements need to be added in a separate section entitled '**Compliance with Ethical Standards**', just before the 'Reference' section and behind the 'Acknowledgments', formulated as shown below:

#### **Compliance with Ethical Standards:**

*In case of funding:* **Funding:** This study was funded by X (grant number X).

**Conflict of Interest:** Author A has received research grants from Company A. Author B has received a speaker honorarium from Company X and owns stock in Company Y. Author C is a member of committee Z.

*OR if no conflict exists:* **Conflict of Interest:** Author A declares that he/she has no conflict of interest. Author B declares that he/she has no conflict of interest.

*In case animals were involved:* **Ethical approval:** All applicable international, national, and/or institutional guidelines for the care and use of animals were followed.

*And/or in case humans were involved:* **Ethical approval:** All procedures performed in studies involving human participants were in accordance with the ethical standards of the institutional and/or national research committee and with the 1964 Helsinki declaration and its later amendments or comparable ethical standards.

If your chapter does *not* contain studies with human participants or animals by any of the authors, please select one of the following statements:

**Ethical approval:** This chapter does not contain any studies with human participants performed by any of the authors.

*Or:* This chapter does not contain any studies with animals performed by any of the authors.

*Or:* This chapter does not contain any studies with human participants or animals performed by any of the authors.

*Or:* This chapter is a review of previously published accounts, as such, no animal or human studies were performed.

*In case humans are involved:* **Informed consent:** Informed consent was obtained from all individual participants included in the study.
