

## Acknowledgement of reviewers 2016

The mission of **Arabian Journal of Geosciences (AJGS)** is to communicate to the international scientific community excellent research results from all fields of Geosciences. The Editor-in-Chief, the Assistant Editors, the Associate Editors and the Publishing Editor carefully worked to ensure that all contributions accepted for publication were rigorously and fairly reviewed by expert referees. Those reviewers have been most supportive in assessing manuscripts. Their input and valuable constructive criticism to the authors are highly appreciated. We gratefully acknowledge their valuable support during the last year 2016.
