Annals of Biomedical Engineering is an interdisciplinary, international journal that publishes original research in the following areas: tissue and cellular engineering and biotechnology; biomaterials and biological interfaces; biological signal processing and instrumentation; biomechanics, rheology, and molecular motion; dynamical, regulatory, and integrative biology; transport phenomena, systems analysis and electrophysiology and imaging.

A major aim of bioengineering is to provide integrated approaches to the solutions of biological and biomedical problems. The philosophy is to provide engineering approaches to enhance the power of the scientific method, and to maintain a balance between experimental observation and quantitative analyses. While the development of theory and of mathematical models is strongly endorsed, these should be evaluated wherever possible using biological data from experiments that test specific hypotheses. The average time from submission to first decision is three weeks. After acceptance, articles are published online in about two weeks

Readership: Physicians and researchers specializing in all aspects of biomedical engineering research and application, including biomaterials, biomechanics, cellular and tissue engineering, imaging and more

Frequency: Monthly

2012 Impact factor: 3.231

Circulation: 1,600

ONLINE ADVERTISEMENTS target the most active members of your target audience as they source information. Springer is a worldwide leader for providing dependable, essential e- information. Connect with your target audience with our online advertising options, or create a more robust impact with both print and online ads.

Our Advertising team focuses on two online advertising options:

Banner Ads - An embedded ad placed on our research site SpringerLink.com. **NEW* Positioning for 2015:** sized at 160x600, these ads are positioned on the top right of our web pages directly adjacent to our content listing. The new, wider skyscraper position will guarantee attention on your brand.

e-TOC Alert - An **EXCLUSIVE** right to advertise in our reader-subscribed email blast, on a per issue purchase basis. This alert details a summary of future content in the upcoming journal issue. Sized at 468x60, it is placed directly above the content listing in the email. These alerts have the **highest click-through rates** of all Springer e-products.

BROWSE OUR JOURNALS AT SPRINGERLINK.COM
