

Instructions for Authors

Journal for General Philosophy of Science

Editorial Office:

JOURNAL FOR GENERAL PHILOSOPHY OF SCIENCE
Prof. Dr. Helmut Pulte
Ruhr-Universität Bochum
Institut für Philosophie
Universitätsstraße 150
D-44780 Bochum
Germany

Email: jgps@ruhr-uni-bochum.de

Manuscripts should be sent via **email** to the address above in one document. They are submitted in doc-format and typed doublespaced with wide margins. The document includes:

(a) **Title, author's name(s), affiliation(s)** with **full address(es)** and contact information (**email-address**) for correspondence on the first page and subsequently

(b) **the article text** which is prepared for a double-blind reviewing process, i. e. this text is to be composed **without any author name(s)**, self-identifying citations and references which might allude to the author(s).

An abstract of 100-150 words in English (also for articles in German) should precede the article text. For articles in German the abstract should start with the (translated) English title.

Keywords: Please provide **4-6 keywords** in alphabetical order.

Notes: Except notes to the head of the article should be numbered consecutively and placed at the end of the article. A note which refers to the head of the article should be indicated by an asterisk and put at the bottom of the first page.

Figures and tables should be referred to as 'Fig.' and 'Tab.' in the captions, but as 'Figure' and 'Table' in the text. They should be numbered consecutively. Please give a detailed caption to each figure, refer to it in the text and note the approximate location in the manuscript. Collect all captions on a separate page. Figures should be submitted as jpeg files of high resolution (min. 600 dpi).

Permissions: Authors wishing to include figures or tables, or long text passages that have already been published elsewhere are required to obtain permission from the **copyright owner(s)** for both the print and the online format and to include evidence that such permission has been granted when submitting their paper. Any material received without such evidence will be assumed to originate from the authors.

Acknowledgements should be placed at the end of the running text and before the references.

References should be listed at the end of the article in alphabetical and chronological order. A journal reference should follow the format of the American Psychological Association (APA), as such:

Kemeny, J.G. (1953). The Use of Simplicity in Induction. *The Philosophical Review* 62, 391-408.

A book reference should follow the format:

Hare, R.M. (1952). *The Language of Morals*. Oxford: Clarendon Press.

In the text, references to an article by more than two authors should be by the first name and 'et al.'; but the

authors' names should all be given in the References section.

Proofs: The author will receive an electronic message by the publisher which gives him access to the electronic version of his manuscript. The author is asked to carry out his corrections accurately and as soon as possible. Substantial changes in content, e.g., new results, corrected values, title and authorship, are not allowed without the written approval of the Editors. When author proofs are delayed the Editors reserve the right to check the final version and pass it for publication without the author's comments.
