INSTRUCTIONS FOR AUTHORS

Manuscript Submission
It is understood that papers submitted for publication have not been published previously and are
not simultaneously offered to any other journal. Before submission, the submitting author must
ensure that the manuscript has been seen and approved by all other named authors.
There are no page charges or charges for the publication of color illustrations or administration
charges for papers published in Chromosome Research.

If you plan to submit a review article or an opinion/hypothesis paper, please contact the Editor-
in-Chief, Conly Rieder, for prior approval.

How to Submit your Manuscript
Authors should submit their manuscripts online:
http://www.edmgr.com/chrs/

Upload all of your manuscript files following the instructions given on the screen. A decision
with regard to acceptance for publication will normally be given within 21 days of receipt of the
manuscript.

When submitting your manuscript, please choose one of the Associate Editors as your preferred
handling editor. If you do not have a preference, or leave this option open, your submission will
be handled by the Editor-in-Chief.

Editor-in-Chief:
Conly L. Rieder, Rensselaer Polytechnic Institute, Troy NY, USA

Associate Editors:
Wendy Bickmore, MRC Human Genetics Unit, Edinburgh, UK
Matthew Breen, North Carolina State University, Raleigh NC, USA
Job Dekker, University of Massachusetts, Worcester, USA
William C. Earnshaw, University of Edinburgh, UK
Tatsuo Fukagawa, National Institute of Genetics, Mishima, Japan
Dean Jackson, University of Manchester, UK
Jiming Jiang, University of Wisconsin-Madison, USA
Hans de Jong, Wageningen, The Netherlands
Irina Solovei, Ludwig Maximillan University, Munich, Germany
Beth A. Sullivan, Duke University, Durham, USA
Walther Traut, Universität Lübeck, Germany
Fengtang Yang, The Wellcome Trust Sanger Institute, UK
Please provide the names, addresses and emails of 5 potential reviewers in the cover letter, as well as the names of up to 3 individuals who you do not want to review the paper. We will make every attempt to honor the requested exclusions.

**Style and Presentation**
The title page should show the paper title, names and addresses of all authors, a short running title, and fax and telephone numbers and the e-mail address for the corresponding author. If the name of the organism that is the subject of the study is included in the title, the scientific name must follow the common name in parenthesis.

**Abstract**
Please provide an abstract of 150 to 250 words. The abstract should not contain any undefined abbreviations or unspecified references.

**Keywords**
Please provide 4 to 6 keywords which can be used for indexing purposes. Key words should be chosen carefully, they are essential to electronic search tools. The text of the paper should be arranged in the following sequence: Introduction, Materials and Methods, Results, Discussion, Acknowledgements and References. Informative legends should be provided for all illustrations and should be grouped together at the end of the paper, along with all tables. Subheadings may be inserted in the main text, but should not be numbered or lettered. It is the responsibility of the authors to ensure that manuscripts are written in clear, grammatical, idiomatic English. Spelling should conform to Webster's International Dictionary or the Concise Oxford English Dictionary and data should be presented simply and concisely.

**Scientific style**
Please always use internationally accepted signs and symbols for units, SI units. Generic names of drugs and pesticides are preferred; if trade names are used, the generic name should be given at first mention.

Gene symbols
Gene symbols, as approved by the HUGO Gene Nomenclature Committee (HGNC) (http://www.genenames.org) must be used.

**Abbreviations**
All abbreviations not obvious to the general reader should be defined the first time they are used. A complete alphabetically arranged list of all abbreviations used, including the definitions, should be included in the manuscript.

**INTEGRITY OF RESEARCH AND REPORTING**

**Ethical standards**
Manuscripts submitted for publication must contain a declaration that the experiments comply with the current laws of the country in which they were performed. Please include this note in a separate section before the reference list.
Conflict of interest
The Conflict of Interest statement should list each author separately by name. Authors must indicate whether or not they have a financial relationship with the organization that sponsored the research. This note should be added in a separate section before the reference list. If no conflict exists, authors should state: This author (name) declares that they have no conflict of interest.

For studies with human subjects include the following:
All procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2000 (5). Informed consent was obtained from all patients for being included in the study.

If doubt exists whether the research was conducted in accordance with the Helsinki Declaration, the authors must explain the rationale for their approach, and demonstrate that the institutional review body explicitly approved the doubtful aspects of the study. If any identifying information about patients is included in the article, the following sentence should also be included: Additional informed consent was obtained from all patients for which identifying information is included in this article.

For studies with animals include the following sentence:
All institutional and national guidelines for the care and use of laboratory animals were followed.

For articles that do not contain studies with human or animal subjects performed by any of the authors:
While it is not absolutely necessary, we recommend to include the following sentence, just to make sure that readers are aware that there are no ethical issues with human or animal subjects: This article does not contain any studies with human or animal subjects performed by any of the authors.

Acknowledgments
Acknowledgments of people, grants, funds, etc. should be placed in a separate section before the reference list. The names of funding organizations should be written in full.

References
References should be cited in the text using the Harvard (name–date) system. Where there are three or more authors, only the first author's name should appear, followed by et al. Where several references are cited at the same point in the text, these should be arranged in chronological order. The reference list should be typed with double spacing and arranged in alphabetical order. References should include: names and initials of all authors (unless there are more than six authors, when only the first three authors should be given, followed by et al.); year of publication; full title of the article; source using abbreviations for journals as shown in Index Medicus; volume number; and first and last page numbers. Abstracts should be identified as such. For citations from books, the chapter title should be followed by the names and initials of
all editors, the title of the book, edition, place of publication, publisher and first and last page numbers.

Examples:

Only accepted papers should be referenced; all other material should be referred to in the text as 'in preparation', 'personal communication' 'unpublished observations' and should not be included in the reference list.

Citing Internet References
World Wide Web: All references should include the same information that would be provided for a printed source (or as much of that information as possible). The Web information is then placed at the end of the reference. It is important to use "Retrieved from" and the date because documents on the Web may change in content, move, or be removed from a site altogether. To cite a Web site in text (but not a specific document), it is sufficient to give the address (e.g., http://www.apa.org) there and no reference entry is needed. However, when citing a particular web page a citation in the text (e.g. Gaten 2000) and an entry in the reference list will be required.

For example:

E-mail: E-mail communications from individuals should be cited as personal communications. The format in the text (personal communications are not cited in the reference list) is as follows: (E. Gaten personal communication, March 28, 2001).

It is possible to send an e-mail note disguised as someone else. Authors – not journal editors or copy editors – are responsible for the accuracy of all references, which includes verifying the source of e-mail communications before citing them as personal communications in manuscripts.

One of the most comprehensive guides to citing internet references is provided by the American Psychological Association: http://www.apastyle.org/elecref.html

Tables and Illustrations
All tables and illustrations should be referred to in the text, with appropriate locations indicated in the text margin. Tables should present new information and not duplicate data included in the
text. Every table should have a descriptive title and, if numerical measurements are given, the units should be included in the column heading. Line drawings should be supplied in a form suitable for high-quality reproduction. Axes should be labeled clearly; other lettering should be kept to a minimum. Avoid the use of fine tints, especially as background to text.

**Electronic Figure Submission**

Supply all figures electronically. For vector graphics, the preferred format is EPS; for halftones and color illustrations please submit JPEG files (TIFF files will be requested later upon acceptance). All illustrations must be labeled on the figure during the initial reviewing phase of submission. MS Office files are also acceptable. Vector graphics containing fonts must have the fonts embedded in the files. Name your figure files with "Fig" and the figure number, e.g., Fig1.eps. Color illustrations should be submitted as RGB (8 bits per channel) files and numbered on the figure to facilitate the reviewing process.

Photographs and photomicrographs should be cropped as close as possible to the area of interest and should be submitted as high resolution (>300dpi) as electronic files together with the manuscript. All photomicrographs and **fluorescent image panels** must be accompanied by a scale bar with the equivalent measurement stated in the figure legend.

**Color figures**

There are no charges for the publication of color illustrations, either in the online or in the printed version of Chromosome Research.

**Electronic Supplementary Material**

Springer accepts electronic multimedia files (animations, movies, audio, etc.) and other supplementary files to be published online along with an article or a book chapter. This feature can add dimension to the author's article, as certain information cannot be printed or is more convenient in electronic form.

**Submission**

i. Supply all supplementary material in standard file formats.

ii. Please include in each file the following information: article title, journal name, author names; affiliation and e-mail address of the corresponding author.

iii. To accommodate user downloads, please keep in mind that larger-sized files may require very long download times and that some users may experience other problems during downloading.

**Audio, Video, and Animations**

Always use MPEG-1 (.mpg) format.

**Text and Presentations**

Submit your material in PDF format; .doc or .ppt files are not suitable for long-term viability. A collection of figures may also be combined in a PDF file.

**Spreadsheets**

i. Spreadsheets should be converted to PDF if no interaction with the data is intended.
ii. If the readers should be encouraged to make their own calculations, spreadsheets should be submitted as .xls files (MS Excel).

**Specialized Formats**
Specialized format such as .pdb (chemical), .wrl (VRML), .nb (Mathematica notebook), and .tex can also be supplied.

**Collecting Multiple Files**
It is possible to collect multiple files in a .zip or .gz file.

**Numbering**
i. If supplying any supplementary material, the text must make specific mention of the material as a citation, similar to that of figures and tables.
ii. Refer to the supplementary files as “Online Resource”, e.g., "... as shown in the animation (Online Resource 3)", “... additional data are given in Online Resource 4”.
iii. Name the files consecutively, e.g. “ESM_3.mpg”, “ESM_4.pdf”.

**Captions**
For each supplementary material, please supply a concise caption describing the content of the file.

**Processing of supplementary files**
Electronic supplementary material will be published as received from the author without any conversion, editing, or reformatting.

**Accessibility**
In order to give people of all abilities and disabilities access to the content of your supplementary files, please make sure that:
i. The manuscript contains a descriptive caption for each supplementary material
ii. Video files do not contain anything that flashes more than three times per second (so that users prone to seizures caused by such effects are not put at risk)

**Permission and Copyright**
It is the responsibility of the author to obtain written permission for a quotation from unpublished material, or for all quotations in excess of 250 words in one extract or 500 words in total from any work still in copyright, and for the reprinting of figures or tables from unpublished or copyrighted material. Copyright in articles published in this journal is the property of Springer to the extent transferable. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources. There are no page charges or administration charges for papers published in this journal.

**AFTER ACCEPTANCE**
Upon acceptance of your article you will receive a link to the special Author Query Application at Springer’s web page where you can sign the Copyright Transfer Statement online and indicate whether you wish to order OpenChoice, or offprints. Once the Author Query Application has been completed, your article will be processed and you
will receive the proofs.

*Open Choice*
In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer provides an alternative publishing option: Springer Open Choice. Springer Open Choice articles receive all the benefits of a regular subscription-based article, but in addition are made available publicly through Springer’s online platform SpringerLink. [http://springer.com/openchoice](http://springer.com/openchoice)

*Copyright transfer*
Authors will be asked to transfer copyright of the article to the Publisher (or grant the Publisher exclusive publication and dissemination rights). This will ensure the widest possible protection and dissemination of information under copyright laws. Open Choice articles do not require transfer of copyright as the copyright remains with the author. In opting for open access, the author(s) agree to publish the article under the Creative Commons Attribution License.

*Proof reading*
The purpose of the proof is to check for typesetting or conversion errors and the completeness and accuracy of the text, tables and figures. Substantial changes in content, e.g., new results, corrected values, title and authorship, are not allowed without the approval of the Editor. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article.

*Online First*
The article will be published online after receipt of the corrected proofs. This is the official first publication citable with the DOI. After release of the printed version, the paper can also be cited by issue and page numbers.
