

## CALL FOR PAPERS

### **Multimedia Tools and Applications (Springer) Special Issue on Data Semantics for Multimedia Systems**

In the last decade, substantial progress has been made in content-based analysis and multimedia streaming to facilitate the development of large-scale multimedia information systems. Together with the recent progress on semantic web, it is now possible to build a new generation of multimedia applications that enable large-scale semantic representation, analysis, and delivery of multimedia data from heterogeneous data sources. However, there is still a long way to go for mature solutions of multimedia database systems that are capable of processing semantics-rich, large-volume multimedia data. It could be even more challenging if such systems are under stringent functional and non-functional (e.g., QoS) requirements.

The goal of this special issue is to bring the semantic web community and multimedia processing & computing community together and provide a forum for multidisciplinary research opportunities, with a focus on how to apply the semantic technologies to the acquisition, generation, transmission, storage, processing, and retrieval of multimedia information. Discussions on future challenges in multimedia information manipulation, as well as practical solutions for the design and implementation of multimedia database software systems are also encouraged.

Topics of interest include but are not limited to practical areas that span both semantic technologies and multimedia processing & computing:

- Automatic generation of multimedia presentations
- Semantic multimedia metadata extraction
- Annotation tools and methods for multimedia semantics
- Media ontology generation/learning/reasoning
- Content-based multimedia analysis
- Multimedia indexing, searching, and retrieving
- Multimedia streaming
- Semantic-based QoS control and scheduling
- Semantic-based Internet data streaming and delivery
- Multimedia standards (e.g., MPEG-7 and XMP) and Semantic Web
- Semantics enabled multimedia applications (including annotation, browsing, storage, retrieval, and visualization)
- Semantics enabled networking and middleware for multimedia applications

## Submission Details

Papers must be original and not submitted to or accepted by any other conference or journal. Prospective contributors are invited to submit papers in A4/US letter, single column, double space format, up to 30 pages long including figures, tables and references. Manuscript submission is handled by the MTAP Online Manuscript Submission website at: <http://www.editorialmanager.com/mtap/>. During submission, you should select your article type as "SI:Data Semantics for Multimedia Systems". Detailed information about the Journal, including an author guide and detailed formatting information is available at: <http://www.springer.com/computer/information+systems/journal/11042>.

## Important Dates

Paper submission deadline: December 15, 2008  
Notification of acceptance: April 15, 2009  
Final Manuscript Due: June 15, 2009  
Publication Date: Fall 2009 (Tentative)

## Guest Editors

Dr. Mei-Ling Shyu  
Department of Electrical  
and Computer Engineering  
University of Miami  
Coral Gables, FL 33146,  
USA  
[shyu@miami.edu](mailto:shyu@miami.edu)

Dr. Jie Bao  
Department of Computer  
Science  
Rensselaer Polytechnic  
Institute  
Troy, NY 12180, USA  
[baojie@cs.rpi.edu](mailto:baojie@cs.rpi.edu)

Dr. Yu Cao  
Department of Computer  
Science  
California State University,  
Fresno  
Fresno, CA 93740, USA  
[yucao@csufresno.edu](mailto:yucao@csufresno.edu)

Dr. Jun Kong  
Department of Computer  
Science  
The North Dakota State  
University  
Fargo, ND 58105, USA  
[jun.kong@ndsu.edu](mailto:jun.kong@ndsu.edu)

Dr. Ming Li  
Department of Computer  
Science  
California State University,  
Fresno  
Fresno, CA 93740, USA  
[mingli@csufresno.edu](mailto:mingli@csufresno.edu)

Dr. Mathias Lux  
Institute for Information  
Technology (ITEC)  
Klagenfurt University  
Klagenfurt, 9020, Austria
