

SPRINGER PUBLISHERS: BOOK SERIES ON

Research in Networked Learning

Series Editors: Vivien Hodgson and David McConnell

CALL FOR BOOK PROPOSALS

The field of networked learning has been emerging as an exciting and innovative area of work since the 1990's. It now includes a very active community of researchers investigating the nexus between open and collaborative learning approaches supported and facilitated by the use of a range of technology. Pedagogy and learning design along with underpinning theory, practice and experience are all important aspects and research interests within networked learning. Research in networked learning is regularly presented at the international bi-annual Networked Learning Conference - www.networkedlearningconference.org.uk

This call is for Individual Book Proposals on research in networked learning.

springer.com

Networked Learning has become a highly relevant area of research and thinking in our networked and digital world. Networked learning is generally restricted to learning that is mediated by digital networks, including social networking and other Web 2/3 virtual spaces that support user interaction and content generation.

The theory, pedagogy and practice of networked learning is concerned with developing approaches to learning that encourage and support learners to be critical and ethically responsible citizens in both their practice and lives.

Do you have an idea for a book on research in networked learning?

We welcome proposals on any aspect of research in networked learning. If you have an idea for a book in the "Research in Networked Learning" series, please contact us with a two to five page outline of your book proposal, explaining its scope and relevance to networked learning, along with a brief description of proposed chapters.

Full details of the call for book proposals and contact details may be found at: http://www.networkedlearningconference.org.uk/book_call.htm

**Please do not hesitate to contact us if you have any questions about the Book Series on "Research in Networked Learning".
Vivien Hodgson and David McConnell.**
