Aims & Scope

The international journal *Distributed Computing* provides a forum for original and significant contributions to the theory, design, specification and implementation of distributed systems.

Topics covered by the journal include but are not limited to: design and analysis of distributed algorithms; multiprocessor and multi-core architectures and algorithms; synchronization protocols and concurrent programming; distributed operating systems and middleware; fault-tolerance, reliability and availability; architectures and protocols for communication networks and peer-to-peer systems; security in distributed computing, cryptographic protocols; mobile, sensor, and ad hoc networks; internet applications; concurrency theory; specification, semantics, verification, and testing of distributed systems.

Submission

Springer now offers authors of *Distributed Computing* the use of *Editorial Manager*, a fully web-enabled online manuscript submission and review system. To keep the review time as short as possible, we request authors to submit manuscripts online to the journal's editorial office. *Editorial Manager* offers authors the option to track the progress of the review process of manuscripts in real time.

Manuscripts should be submitted to: <http://www.editorialmanager.com/dist/>

In case of editorial questions please contact the Editor-in-Chief at distcomp@cs.technion.ac.il
