The Future of Glycerol
New Uses of a Versatile Raw Material
RSC Green Chemistry Book Series

Series Editors

James H Clark, Department of Chemistry, University of York, York, UK
George A Kraus, Department of Chemistry, Iowa State University, Iowa, USA

Green Chemistry is one of the most important and rapidly growing concepts in modern chemistry. Through national awards and funding programmes, national and international courses, networks and conferences, and a dedicated journal, Green Chemistry is now widely recognised as being important in all of the chemical sciences and technologies, and in industry as well as in education and research. The RSC Green Chemistry book series is a timely and unique venture aimed at providing high level research books at the cutting edge of Green Chemistry.

Titles in the Series:

The Future of Glycerol: New Uses of a Versatile Raw Material
By Mario Pagliaro, CNR, Institute of Nanostructured Materials and Institute for Scientific Methodology, Palermo, Italy and Michele Rossi, Department of Inorganic Chemistry, University of Milan, Milan, Italy

The Future of Glycerol
New Uses of a Versatile Raw Material

Mario Pagliaro
CNR, Institute of Nanostructured Materials and Institute for Scientific Methodology, Palermo, Italy

Michele Rossi
Department of Inorganic Chemistry, University of Milan, Milan, Italy
Future of Glycerol
New Usages for a Versatile Raw Material
Rossi, M.
2008, 104p., Hardcover
ISBN: 978-0-85404-124-4
A product of Royal Society of Chemistry
