

UNDER THE AUSPICES OF H.E. THE PRESIDENT OF THE HELLENIC REPUBLIC  
MR. PROKOPIOS PAVLOPOULOS  
**17<sup>TH</sup> INTERNATIONAL  
CONFERENCE ON CHEMISTRY AND THE ENVIRONMENT**  
16-20 June, 2019, Thessaloniki, Greece

The Association of Greek Chemists (AGC) and the Division of Chemistry and the Environment (DCE) of European Chemical Society (EuChemS) cordially invite you to the 17<sup>th</sup> International Conference on Chemistry and the Environment in Thessaloniki, Greece in June 2019. The Conference will be held at the Aristotle University Research Dissemination Centre (KEDEA) ICCE 2019 addresses scientists in the academia, industry and in governmental institutions alike and intends to provide a unique information and communication platform for environmental scientists and a forum of professional exchange with collaborators and colleagues of related disciplines. The 17<sup>th</sup> ICCE will continue along its scientific tradition providing a representative spectrum of up-dated scientific information for modern applications of Chemistry in the relevant field of Environmental Research and technology development. Dedicated satellite events will be organized as pre and post-conference events highlighting special emerging scientific aspects of very recent developments and requirements.

ICCE 2019 SESSION TITLES	
Air pollution – chemistry and health risks	
Oxidation and Advanced Oxidation processes in water and wastewater treatment	
Recycling and resource reuse as tools for efficient circular economy	
Soil Pollution and Monitoring	
Recent advances in targeted and non-targeted screening strategies based on high resolution accurate mass spectrometry in environmental and food analysis	
Environmental problems relevant to Mediterranean Sea and Gulf of Mexico (MedSea-GuMex)	
Innovation in drinking water treatment	
Advances in wastewater treatment	
Environmental applications of nanomaterials	
Heavy metals and other inorganic pollutants in the environment and removal technologies	
Green and sustainable chemistry strategies for agricultural and food waste biomass valorizations	
Metabolomics	
Humic Substances: environmental dynamics and impact on water quality	
Analytical Chemistry in environmental monitoring and chemistry studies	
Identifying critical nutrient emission zones in landscapes: a key for reducing water eutrophication?	
Urban contaminants: control measures, remediation actions and toxicological implications	
Micropollutants and microplastics in the aquatic environment	
Risk assessment of emerging pollutants experimental and modelling approaches to fill the data gaps	
Investigating the environmental fate and ecotoxicology of glyphosate	
ICCE 2019 SATELLITE EVENTS	
Multi-residue analysis of modern pesticides in soil	
Glyphosate	
University Education in Environmental Sciences	
Water reuse as a secure path to tackle water scarcity	
Scientific writing and publishing	
IMPORTANT DATES	
Abstract Submission <b>Deadline Extension</b>	<b>BY 28 February 2019</b>
Notification Of Acceptance	<b>BY 15 March 2019</b>
Early Bird Registration Deadline	<b>BY 30 March 2019</b>
