

SPRINGER NATURE

Instructions for Authors

Manuscript submission:

All proposals will be peer-reviewed (single blind).

The volumes of the book series are edited volumes and manuscripts are usually solicited by the respective volume editors.

All manuscripts get peer reviewed (single blind) and should be submitted online.

Ethical requirements:

Authors need to disclose any conflict of interest they might have, funding sources and in addition have to confirm that experiments described in the chapter involving humans or animals were conducted by respecting the corresponding ethical guidelines and that informed consent was obtained in case humans were involved. Authors should include these statements in a separate section entitled “Compliance with Ethical Standards” after the acknowledgements and before the references section as outlined in the Book Ethics Policy, to be downloaded from the website.

<https://www.springer.com/series/13176>

Manuscripts are checked for plagiarism.

The book series supports the research data type 1 policy, [Research Data Policy](#).

The book series thus encourages authors, where possible and applicable, to deposit data that support the findings of their research in a public repository. Authors and editors who do not have a preferred repository should consult Springer Nature’s list of repositories from our research data policy website: [List of Repositories](#).

General repositories - for all types of research data - such as figshare and Dryad may also be used.

Datasets that are assigned digital object identifiers (DOIs) by a data repository may be cited in the reference list. Data citations should include the minimum information recommended by DataCite: authors, title, publisher (repository name), identifier, <https://datacite.org/>.

Springer Nature provides a research data policy support service for authors and editors, which can be contacted at researchdata@springernature.com.

This service provides advice on research data policy compliance and on finding research data repositories. It is independent of journal, book and conference proceedings editorial offices and does not advise on specific manuscripts.

Special manuscript guidelines for the series:

Please follow our standard **Manuscript guidelines for English books** and the **Key style points**. The documents can be downloaded at: <https://www.springer.com/us/authors-editors/book-authorseditors/resources-guidelines/book-manuscript-guidelines>

Special manuscript guidelines for the series:

- Each chapter has to be preceded by an abstract that summarizes the content (no more than 200 words).
- All chapters need to either end with a “Conclusion” or “Translational Perspectives”, or both.
- A chapter should not exceed 20-30 pages (á 3.700 characters), and contain no more than 200-250 references, sorted in numerical order, according to the Springer Basic Style.
