Journal of Inherited Metabolic Disease

— Official Journal of the Society for the Study of Inborn Errors of Metabolism
Profile

The JIMD aims to improve the management and understanding of inherited metabolic disorders by enhancing communication between scientists in the field throughout the world. It publishes results of original research and new or important observations pertaining to any aspect of inherited metabolic disease in humans and higher animals. This includes clinical (medical, dental and veterinary), biochemical, genetic (including cytogenetic, molecular and population genetic), experimental (including cell biological), methodological, theoretical, epidemiological, ethical and counselling aspects.

The JIMD also reviews important new developments or controversial issues relating to metabolic disorders and publishes reviews and short reports arising from the Society’s annual symposia. A distinction is made between peer-reviewed scientific material that is selected because of its significance for other professionals in the field, and non-peer-reviewed material that aims to be important, controversial, interesting or entertaining.
