Key Style Points:
Table of Contents

1 The table of contents starts with
   the first chapter of the book. Front
   matter material, e.g., the preface, is
   not listed in the table of contents.

2 Chapter numbers, if any, are always
   Arabic numerals (Chap. 1, Chap. 2...),
   part numbers are Roman numerals
   (Part I, Part II...).

3 If chapters are numbered, they are
   numbered consecutively throughout
   the book, not starting anew with
   each part.
   ► An introduction to the subject of
     the book (historical background,
     definitions, or methodology)
     appears as the first chapter
     and therefore is included in the
     chapter numbering, i.e.,
     “Chapter 1”.
   ► If a book is divided into parts,
     there can only be one chapter
     before the first part.

4 For monographs the part
   and chapter titles and the first two levels
   of headings appearing in chapters
   are included.

5 For contributed works usually only
   chapter titles and author names are
   included.

6 The References section at the end of
   a chapter is not numbered.
