

Encyclopedia of aquatic ecotoxicology
(J.-F. Féraud and C. Blaise, Editors)
Springer Publishers, Dordrecht, The Netherlands

Contents (104 chapters!)

Book publication is expected in Spring 2013.

1. Acid rain ecotoxicity, V. Felten et al.	11. Assessing ecological risks at contaminated sites, M.L. Graham et al.	21. Biomarkers of ecological relevance, C. Mouneyrac and C. Amiard-Triquet	31. Ecotoxicity of explosives, G. R. Lotufo	41. Environmental river biofilms as biological indicators of the impact of chemical contaminants, A. Villeneuve et al.	51. Genotoxicity of contaminants: amphibian micronucleus assays, F. Mouchet and L. Gauthier
2. Active biomonitoring, V. Wepener	12. Bacteria in ecotoxicology: Microtox basic, B. T. Johnson	22. Biotic ligand model, P.G.C. Campbell and C. Fortin	32. Ecotoxicity of taste and odour compounds, S. B. Watson	42. Environmental teratogenesis, J. Conley and S. Richards	52. Genotoxicity of contaminants: Comet assay, A. Devaux and S. Bony
3. Amphibian ecotoxicology, A. Gendron	13. Bacteria in ecotoxicology: Recombinant luminescent bacteria, G. Thouand and M. J. Durand	23. Bivalves in ecotoxicology, F. Gagné and T. Burgeot	33. Ecotoxicogenomics, H. Osachoff and G. van Aggelen	43. Environmental transformation of organic substances, C. Casellas et al.	53. Green chemistry and ecotoxicology, I. T. Horváth and J. P. Giesy
4. Antifouling agents and associated ecotoxicity, É. Pelletier	14. Beluga whales and ecotoxicity, D. Martineau	24. Cell lines in aquatic toxicology, X. Zhang et al.	34. Ecotoxicological risk assessment and management of tire wear particles, G. Dave and A. Wik	44. Estrogenic endocrine disrupting chemicals, J. Cornelius Swart and E. J. Pool	54. Harmful algal blooms, S. B. Watson and L. Molot
5. Aquatic biomarkers, C. Cossu-Leguille and P. Vasseur	15. Benthic community ecotoxicology, L. Grapentine	25. Compliance and enforcement toxicity testing, K.G. Doe and P.M. Jackman	35. Ecotoxicology: historical overview and perspectives, J.F. Féraud	45. Eutrophication, C. Hudon	55. Histopathological approaches in ecotoxicology, M. Wai-Lun Chiang and D. Wai-Ting Au
6. Aquatic ecotoxicology of veterinary antibiotics and pharmaceuticals, M. Waiser	16. Bioavailability of contaminants, C. Gourlay-Francé and M-H Tusseau-Vuillemin	26. Contaminated sediment core profiling, M.G. Cantwell	36. Effect-directed Analysis, W. Brack	46. Evaluating impacts of multiple stressors on aquatic ecosystems using isobolic models, A. C. Alexander and J. M. Culp	56. Hydra in ecotoxicology, C. Ginou and D. Holdway
7. Aquatic immunotoxicity, P. Brousseau and M. Fournier	17. Biodegradability in ecotoxicology, P. Poupin	27. Cyanotoxins and their environmental significance, I. R. Falconer	37. Emerging issues in ecotoxicology: Characterization of (metallic) nanoparticles in aqueous media, K.J. Wilkinson	47. Evolutionary toxicology, D. Turcotte and A. Talbot	57. Impacts of land contaminants on aquatic ecosystems, J. A. Smink and S. J. Klaine
8. Aquatic macrophytes in ecotoxicology, M. L. Hanson	18. Biological test methods, L. Taylor and R. Scroggins	28. Diatoms in ecotoxicology, T. Debenest et al.	38. Emerging issues in ecotoxicology: Pharmaceuticals and personal care products (PPCPs), J. Garric	48. Flow cytometry applications in aquatic toxicology, J. Stauber and M. Adams	58. <i>In situ</i> bioassays, B.J.D. Ferrari et al.
9. Aquatic mesocosms in ecotoxicology, T. Caquet	19. Biology-based and population dynamics modeling in ecotoxicology, A. Péry and R. Beaudouin	29. Ecological risk assessment, M. L. Graham et al.	39. Emerging issues in ecotoxicology: POPs, L. Blaha and I. Holoubek	49. Forensic Ecotoxicology, T. K. Collier	59. Knowledge translation and knowledge brokering, A. T. Bielak
10. Artificial mussels, R. S.S. Wu and T. Chu Lau	20. Biomarkers in fish ecotoxicology, D. M. Janz	30. Ecological stoichiometry, M. Danger and F. Maunoury-Danger	40. Environmental research needs (in ecotoxicology) in relation to public policies, E. Vindimian	50. Genetically modified organisms in the environment, B. Zhu (in memoriam), M. Douville and F. Gagné	60. Landfill leachate ecotoxicity, S. Waara

61. Macroinvertebrate ecotoxicity testing (M.E.T.), A. Bartlett and W. Norwood	69. Nanomaterials in the Environment, S. J. Klaine et al.	77. Phytotoxicology: contaminant effects on markers of photosynthesis, P. Eullaffroy	85. QSAR in ecotoxicology, A. Lombardo et al.	93. Sentinels (biomonitors) of trace metals in fresh waters, L. Hare	101. Toxicity reduction evaluation (TRE), L. Novak and K. Holtze
62. Metal speciation in aquatic ecotoxicology, C. Gagnon and B. Vigneault	70. New perspectives in assessing the effects of endocrine disrupting chemicals in fish, D. G. Cyr et al.	78. Phytotoxicity of engineered nanomaterials (ENMs), A.-N. Petit	86. Rapid tests for community level risk assessments, B. J. Kefford	94. Sewage treatment plant effluents and endocrine disruption issues, P. Kestemont and S. Depiereux	102. Toxic Units (TU) indicators. P. C. von der Ohe and D. de Zwart
63. Microbial assay for risk assessment (MARA), K. Wadhia	71. Oceans and human health, J. M. Trtanj et al.	79. POCIS passive samplers in combination with bioassay-directed chemical analyses, H. Budzinski and M.-H. Dévier	87. REACH legislation in ecotoxicology, C. Perazzolo and E. Saouter	95. Species At Risk (SPEAR) biomonitoring indicators, R.B. Schäfer and M. Liess	103. Trophic transfer of trace elements, L. Hare
64. Microbial bioremediation of aquatic environments, M. S. Goñi Urriza et al.	72. Optical sensors for detection of cyanobacteria, B. Marsalek and P. Babica	80. Pollution acclimation, adaptation, resistance and tolerance in ecotoxicology, S. Biagianti-Risbourg et al.	88. Rotifers in ecotoxicology, R. Rico-Martínez et al.	96. Standardization of ecotoxicological tests - the process, L. Taylor and R. Scroggins	104. Water quality guidelines for the protection of aquatic ecosystems, D. Nugegoda and G. Kibria
65. Microbiotests in ecotoxicology, C. Blaise	73. Parasites and ecotoxicology: fish and amphibians, D. J. Marcogliese and L. Giamberini	81. Polychaetes in ecotoxicology, C. Amiard-Triquet et al.	89. Science policy linkages, K. Schaefer	97. Statistics for analyzing ecotoxicity test data, L. Van der Vliet and C. Ritz	
66. Mixture effects in ecotoxicology, N. Chèvre and V. Gregorio	74. Parasites and ecotoxicology: molluscs and other invertebrates, L. Giamberini et al.	82. Protozoans in ecotoxicology, G. Nałęcz-Jawecki	90. Sediment ecotoxicity, G. A. Burton	98. Stimulatory responses, hormesis and essentiality, in ecotoxicology, B. J. Kefford and L. Zaluzniak	
67. Modes of action of chemical pollutants, B. I. Escher	75. Photo-toxicity in ice, L. Blaha	83. Pulse exposure in ecotoxicology, N. Chèvre and N. Vallotton	91. Sediment quality guidelines, G. Batley and S. Simpson	99. Test batteries in ecotoxicology, G. Repetto	
68. Monitoring of oil-degrading bacteria by stable isotope probing, C. Sauret and J.-F. Ghiglione	76. Phytoremediation in ecotoxicology, R. Dosnon-Olette and P. Eullaffroy	84. Quality assurance in ecotoxicology: the why's and how's, G. Férard and J.-F. Férard	92. Sediment toxicity identification evaluation, R. M. Burgess and K. T. Ho	100. Toxicity of urban stormwater, J. Marsalek et al.	

“With its 104 chapters, this *Encyclopedia of aquatic ecotoxicology* reveals the diversity of issues, problems and challenges that have faced, and are facing today, receiving environments and also indicates ways by which tools, strategies and future investigations can contribute to correct, minimize, solve and prevent water quality degradation. Structured homogeneously, book chapters convey salient information on historical background, features, characteristics, uses and/or applications of treated topics, often complemented by illustrations and case studies, as well as by conclusions and prospects. This makes book material most suitable for teaching purposes. Academics, for example, could literally deliver comprehensive lectures to students simply based on chapter outlines and contents.”
