

# Nanostructure Science and Technology

**Publish your next book in this series!**

**Series Editor: David J. Lockwood**

The scope of the series is designed to cover as much of the subject matter as possible – from physics and chemistry to biology and medicine, and from basic science to applications. At present, the most significant subject areas are concentrated in basic science and mainly within physics and chemistry, but as time goes by more importance will inevitably be given to subjects in applied science and will also include biology and medicine. The series will naturally accommodate this flow of developments in the sciences and technology of nanostructures and maintain its topicality by virtue of its broad emphasis. It is important that emerging areas in the biological and medical sciences, for example, not be ignored as, despite their diversity, developments in this field are often interlinked. The series will maintain the required cohesiveness from a judicious mix of edited volumes and monographs that while covering subfields in depth will also contain more general and interdisciplinary texts.

Thus the series is planned to cover in a coherent fashion the developments in basic research from the distinct viewpoints of physics, chemistry, biology, and materials science and also the engineering technologies emerging from this research. Each volume will also reflect this flow from science to technology. As time goes by, the earlier series volumes will then serve as reference texts to subsequent volumes.

**More information about the series and its titles:** [www.springer.com/series/6331](http://www.springer.com/series/6331)

**Titles recently published in this series include:**

[Nanotechnology Standards](#)

Murashov, Vladimir; Howard, John (Eds.)

[Nanotechnology for Electronics, Photonics, and Renewable Energy](#)

Korkin, Anatoli; Krstić, Predrag S.; Wells, Jack C. (Eds.)

[Environmentally Benign Photocatalysts](#)

[Applications of Titanium Oxide-based Materials](#)

Anpo, Masakazu; Kamat, Prashant V. (Eds.)

[Electrochemical Nanotechnologies](#)

Osaka, Tetsuya; Datta, Madhav; Shacham-Diamand, Yosi (Eds.)

[Photoemission from Optoelectronic Materials and their Nanostructures](#)

Ghatak, Kamakhya Prasad, Bhattacharya, Sitangshu, De, Debashis

[Nanostructured Materials for Electrochemical Energy Production and Storage](#)

Leite, Edson Roberto (Ed.)

**We look forward to receiving your book proposal for Nanostructure Science and Technology!**

# Get Read. Publish With Springer.

## When you publish with Springer your work gets the attention it deserves:

- ▶ dedicated and professional editorial guidance
- ▶ standardized production processes and speedy publication
- ▶ immediate global visibility and availability
- ▶ royalties reflecting a diversity of revenue streams

## Do you want the widest possible continuous readership for your book?

When you publish with us, your work will:

- ▶ always be available in print with print-on-demand
- ▶ be accessible 24/7 worldwide online and on e-reading devices
- ▶ be available to students and peers for 24.95 EUR/USD

## Let your book benefit from being part of the largest STM eBook Collection

Springer's world-leading and highly interdisciplinary eBook Collection is widely used in academic, corporate and governmental libraries. Your eBook will benefit from cross-linking and increased usage through seamless integration with other content on our online content platform SpringerLink.

SpringerLink generates 450 million visits per year, and the Collection has:

- ▶ more than 44,000 eBooks currently available (textbooks, monographs, edited volumes, proceedings)
- ▶ more than 180 online reference works currently available
- ▶ approximately 6,000 new eBooks added per year
- ▶ more than 2,500 online journals

When you publish your book with Springer you will profit from the high usage and visibility of this Collection.

The average number of chapter downloads per eBook in this Collection was 1,409 in 2009.

Your eBook will also be fully hyperlinked and conveniently searchable, qualities that have made eBooks a widely adopted format.

## MyCopy – your book available for 24.95 EUR/USD

Springer offers readers a convenient way to obtain a printed version of your eBook file for personal use: MyCopy.

It allows library patrons to order a softcover for 24.95 EUR/USD, provided their library has access to Springer's eBook Collection.

The MyCopy service is expanding and is currently available in 20 countries. See [springer.com/mycopy](http://springer.com/mycopy)

This unique format will boost the popularity of your book.

## How we help you get more readers

We are committed to optimizing the visibility of your book; our ongoing efforts include:

- ▶ free online review copies for magazines and journals
- ▶ promotional flyer in convenient PDF format
- ▶ inclusion in Google's eBookstore
- ▶ distribution through Amazon, with "Look Inside" feature and Kindle edition
