FREE Online Conference Service

Powerful tools and expert technical support at no charge.

Springer now offers the OCS online manuscript submission and review system. All conferences whose proceedings are published in the Springer Proceedings in Mathematics and Statistics (PROMS) series may now use OCS - with technical support - free of charge.

Organizing and supervising an evaluation committee can be a time-consuming and often frustrating chore, with potential bottlenecks all along the way.
Springer's web-based OCS manages committee organization and workflow in a smooth and logical fashion, backed by high-capacity servers built to handle hundreds of simultaneous operations reliably and securely.

OCS dramatically simplifies the chore of organizing review committees, and facilitates the movement of manuscripts through submission, reading, discussion, acceptance, revision and publication. Every increment of the process, from submission of papers to preparation of proceedings, is handled through the same intuitive interface.

Powerful Tool Features

- Easy online submission - authors register, submit and correspond online
- Permits submission of abstract or full paper
- Customizable look and feel - set colors and display logos for branding conferences and sponsors
- High-capacity servers - ensure the security and reliability of the process
- Configurable reports - reviewer reports can include a variety of elements
- Context-sensitive online help - displays the appropriate topics at each stage
- Free technical support - saves time, minimizes frustration

For program committee chairs, OCS offers a simple interface for committee organization and management, plus effective tools for delegating papers, and supervising discussion, comments and revision. As papers move toward publication, OCS helps the chair with stage-by-stage management of workflow and deadlines.

OCS Helps Organize and Automate the Task of Committee Organization

- Assigns and manages reader rights
- Identifies reader conflicts, and bids based on expertise and preference
- Permits blind and double-blind review modes
- Improves communication with automatic email notices, and discussion forums
- One-step delegation balances reviewer workload, while incorporating bids and conflicts
- Manages scheduling and deadlines

Springer recommends the use of OCS for PROMS conferences.
OCS comes through where other decision-support systems leave off, offering both feature-based online help and free individual technical support.
