

## Public Administration and Information Technology

Series Ed.: M.P. Rodriguez Bolivar

Public Administration and Information Technology publishes authored and edited books that examine the application of information systems to common issues and problems in public administration. This series examines both the successes of Information and Communication Technology (ICT) adoption and some of the most important challenges to implementation. The books published in this series will address all areas of public administration, through the use of information technology adoption in the public and nonprofit sectors, and in the private sector where important lessons can be learned for public managers and policy analysts. New and emerging technologies that will have a lasting impact on public administration will be featured in this series. Both developed and developing countries will be examined in this series. The series particularly welcomes books that cover international dimensions of public administration and information technology. The research in this series will be able to bridge both theory and practice to provide relevance to public managers. The series will cover all aspects of e-governance/egovernment research, and new and emerging trends and issues in this research. The series publishes edited books, monographs, upper-level textbooks and research handbooks. For authors interested in submitting a book proposal, please email the editor (Manuel Pedro Rodriguez Bolivar, University of Granada, [manuelp@ugr.es](mailto:manuelp@ugr.es)).

Please, visit our webpage at <https://www.springer.com/series/10796>, in which you can download the proposal form to write your project and send it to the editor previously mentioned.

Best regards,

--
