Compliance with Ethical Requirements

Materials for Renewable and Sustainable Energy requests that all authors comply with Springer’s ethical policies.

To ensure objectivity and transparency in research and to ensure that accepted principles of ethical and professional conduct have been followed, authors should include information regarding sources of funding, potential conflicts of interest (financial or non-financial), informed consent if the research involved human participants, and a statement on welfare of animals if the research involved animals.

Authors should include the following statements (if applicable) in a separate section entitled “Compliance with Ethical Standards” before the References when submitting a paper:

- Disclosure of potential conflicts of interest
- Research involving Human Participants and/or Animal
- Informed consent

Before submitting your article check the Instructions for Authors carefully.

The corresponding author should be prepared to collect documentation of compliance with ethical standards and send if requested during peer review or after publication.

The Editors reserve the right to reject manuscripts that do not comply with the above-mentioned guidelines. The author will be held responsible for false statements or failure to fulfill the above-mentioned guidelines.

In order to safeguard the quality of its publications, Springer has updated the policy on Publishing Ethics. In line with the philosophy of the Committee on Publishing Ethics (COPE) we follow the principle that we have a prime duty to maintain the integrity of the scientific record. By providing Springer’s Guide on Publishing Ethics, we aim to optimally assist Springer Publishing Editors as well as Editors-in-Chief, Editors, Reviewers and Authors with this task.

Read all about Springer’s ethical policies here, where you will also find the Guide.
