Disclosure of Interest Form  
*Prevention Science*

When an author or the institution of the author has a relationship, financial or otherwise, with individuals or organizations that could influence the author’s work inappropriately, a conflict of interest may exist. Examples of potential conflicts of interest may include but are not limited to academic, personal, or political relationships; employment; consultancies or honoraria; and financial connections, such as stock ownership and funding. Although an author may not feel that there are conflicts, disclosure of relationships and interests that could be viewed by others as conflicts of interest affords a more transparent and prudent process.

All authors for *Prevention Science* must complete this form and disclose any actual or potential conflict of interest.

Each author must complete and submit this form to the corresponding author, who will collect and maintain them. The corresponding author will then include a summary statement in the Acknowledgements section of the manuscript that reflects what is recorded in all potential conflict of interest disclosure form(s).

- ☐ I have no potential conflict of interest pertaining to this *Prevention Science* submission.

- ☐ I note the following potential conflict(s) of interest pertaining to this *Prevention Science* submission.
