

CALL FOR PAPERS

MATHEMATICAL GEOSCIENCES SPECIAL ISSUE ON *Geostatistics applied to Environmental Applications*

Guest Editors: Jennifer McKinley and Peter Atkinson

This Special Issue of Mathematical Geosciences is dedicated to geostatistics applied to environmental applications and will comprise a set of selected papers presented at geoENV 2018, the 12th International Conference on Geostatistics for Environmental Applications, held in Belfast in July, 2018. The conference featured sessions covering theory in geostatistics, multiple point statistics and spatio-temporal statistics in conjunction with applications in surface and sub-surface hydrology, soil geochemistry, health and the environment, mining and geological applications. Therefore, we are pleased to invite authors who presented their work at the geoENV2018 conference to submit their paper in the following areas:

- Geostatistical methodology
- Spatial statistics
- Multiple point geostatistics
- Spatial-temporal statistics
- Natural resources
- Hydrology, groundwater modelling
- Soil geochemistry
- Health, epidemiology and the environment
- Contaminated land and risk assessment
- Mining and geological applications
- Remote sensing

The timeline for the special issue is the following:

- Paper submission before October 31st, 2018
- Return of reviews to authors before January 31st, 2019
- Submission of final papers by March 31st, 2019
- Publication in Spring or Summer 2019.

Submit Papers on-line through the journal's website

<http://www.springer.com/journal/11004>
following the Instructions for Authors.
