**SPECIAL ISSUE ON**  
**MAC for the Next Generation Networks in Unlicensed Band**

**Overview:**

Recent years, both cellular networks and wireless local area networks (WLAN) pay great attentions to the next generation networks in unlicensed band (UB-NGNs) in order to catch up with the ever-increasing wireless traffic demands. UB-NGNs include, for example, MuLTFire, Licensed-Assisted Access (LAA), LTE-u in cellular networks, IEEE 802.11ax, 802.11ay, and etc. Media access control or multiple access control (MAC) is indispensable for wireless networks. It tries to make sure multiple users to share the wireless resources efficiently, fairly and systematically. However, since unlicensed band is open and even free, the MAC for UB-NGNs will be quite different and difficult comparing with networks in licensed band. Now, UB-NGNs are still being studied, therefore the MAC technologies for the current UB-NGNs need to fully design and further optimize urgently. Therefore, This Special Issue focuses on the MAC technology for the UB-NGNs.

The special issue focuses on the MAC technologies for the next generation networks in unlicensed band.

**Topics**

Topics of interest include, but are not limited to, the following scope:

<ul style="list-style-type: none"><li>- MAC analysis for UB-NGNs</li><li>- MAC protocol design for UB-NGNs</li><li>- Simulation platform and testbed for UB-NGNs</li><li>- Resource allocation and scheduling scheme and/or algorithm for UB-NGNs</li><li>- Coexistence solutions for UB-NGNs</li><li>- Big data and artificial intelligence for MAC design of UB-NGNs</li></ul>	<ul style="list-style-type: none"><li>- New multiple access technologies for UB-NGNs such as non-orthogonal multiple access, Filtered-OFDMA</li><li>- New features for UB-NGNs, e.g., device-to-device (D2D), Internet of things (IoTs), full duplex communications, non-orthogonal multiple access, and etc.</li></ul>
--	---

**Important Dates**

- **Manuscript submission deadline: June 1, 2018**
- Notification of acceptance: Aug 15, 2018
- Submission of final revised paper: Oct 1, 2018
- Publication of special issue (tentative): 4nd Quarter, 2018

**Submission Procedure**

Authors should follow the MONET Journal manuscript format described at the journal site. Manuscripts should be submitted on-line through <http://www.editorialmanager.com/mone/>.

A copy of the manuscript should also be emailed to the Guest Editor at the following email address:  
libo.npu@nwpu.edu.cn.

### **Guest Editors:**

#### **Bo Li, Northwestern Polytechnical University (libo.npu@nwpu.edu.cn)**

Dr. Bo LI received the B.S., M.S. and Ph.D degrees in communications engineering from Xidian University, Xi'an, China, in 1994, 1996 and 2002, respectively. From 1997 to 1998, he was selected to study in the Electrical Engineering Department of Shizuoka University in Japan as an exchange student. From 2002 to 2004, he was a Postdoctoral Researcher at the University of Trento, Trento, Italy. In 2007, as a visiting professor, he visited the CITI LAB of INSA LYON for 6 months. He is currently with the School of Electronics and Information Engineering, Northwestern Polytechnical University, Xi'an, China, as a Full-Time Professor. He has authored about 80 research papers in the area of wireless communications and networking. Among these papers, some are published on famous international journals, such as, the IEEE Transactions on Vehicular Technology, the IEEE Communication Letters, and the International Journal of Computer Networks and so on. Moreover, these papers are cited by other authors for over 200 times. His current research interests include broadband wireless mobile networks, wireless local area networks, multimedia wireless communication networks, cross-layer design of wireless communications systems and resource allocations. In the above research areas, he is holding 13 authorized invention patents.

#### **Lijun Qian, Prairie View A&M University (LiQian@pvamu.edu)**

Dr. Lijun Qian is a Professor in the Department of Electrical and Computer Engineering at Prairie View A&M University (PVAMU), a member of the Texas A&M University System located near Houston Texas. He is also the Director of the Center of Excellence in Research and Education for Big Military Data Intelligence (CREDIT Center) and the Wireless Communications Lab (WiComLab). Before joining PVAMU, he was a MTS in the Networks and Systems Research Department of Bell-Labs at Murray Hill, New Jersey. He is a visiting professor of Aalto University, Finland. He received his BE from Tsinghua University in China, MSEE from Technion-Israel Institute of Technology, and PhD from Rutgers University. His research interests are in big data analytics, wireless communications and mobile networks, network security and intrusion detection, and computational systems biology. His research is supported by NSF, DOE and DOD.

#### **Daji Qiao, Iowa State University (daji@iastate.edu)**

Daji Qiao is an Associate Professor and the Director of Graduate Education in the Department of Electrical and Computer Engineering at Iowa State University, Ames, Iowa, USA. He received his PhD degree from The University of Michigan, Ann Arbor, Michigan in 2004. Prior to that, he received his MS and BE degrees from The Ohio State University, Columbus, Ohio, and Tsinghua University, Beijing, China, respectively. Dr. Qiao's research interests are in the area of wireless networking and mobile computing. He has authored/co-authored more than 80 technical papers in various international journals and conferences. In 2015, he received the Best Paper Award in IEEE Wireless Communications and Networking Conference (WCNC). Dr. Qiao has served on the organizing and technical program committees of numerous networking conferences. He has served on the editorial board of Elsevier Ad Hoc Networks, IEEE Communications Letters, and Journal of Communications and Networks. In 2016, he served as the leading guest editor of Elsevier Ad Hoc Network Special Issue on Self-organizing and Smart Protocols for Heterogeneous Ad hoc Networks. Dr. Qiao was the program chair of ICST International Conference on Heterogeneous Networking for Quality, Reliability, Security and Robustness (QShine) in 2010, a symposium co-chair of IEEE Global Communications Conference (Globecom) in 2011, a track co-chair of IEEE International Conference on Computer Communications and Networks (ICCCN) in 2014 and 2008, the finance chair of ACM International Conference on Mobile Computing and Networking (MobiCom) in 2009, and the publication chair of IEEE International Symposium on a World of Wireless, Mobile and Multimedia Networks (WoWMoM) in 2010. He is a senior member of the IEEE and a member of the ACM.

**Shihai Shao, University of Electronic Science and Technology of China, (ssh@uestc.edu.cn)**

Prof. SHAO received the B.E. and Ph.D. degrees in communication and information systems from the University of Electronic Science and Technology of China (UESTC), Chengdu, China, in 2003 and 2008, respectively. Since 2015, he has been a Professor with the National Key Laboratory of Science and Technology on Communications, UESTC as a Full-Time Professor. He has authored/co-authored more than 70 research papers in the area of wireless communications. Among these papers, some are published on famous international journals, such as the IEEE Transactions on Wireless Communications, the IEEE Transactions on Signal Processing, and the IEEE Transactions on Vehicular Technology. These research papers are cited worldwide for over 300 times. His current research interests include the design, modeling, and the analysis of full-duplex transceivers, MIMO detection, and all-digital transceivers. In his research areas, he is holding 24 authorized invention patents.
