

Ethical Requirements – Instructions for Authors of Topics in Medicinal Chemistry

Authors need to disclose any conflict of interest they might have, funding sources and in addition have to confirm that experiments described in the chapter involving humans or animals were conducted by respecting the corresponding ethical guidelines and that informed consent was obtained in case humans were involved. In case no humans or animals were involved in the study, this has to be stated as well (please see below).

The statements need to be added in a separate section called **Compliance with Ethical Standards**, just before the Reference section and behind the Acknowledgments, formulated as shown below:

Compliance with Ethical Standards:

In case of Funding. Funding: This study was funded by X (grant number X).

Conflict of Interest: Author A has received research grants from Company A. Author B has received a speaker honorarium from Company X and owns stock in Company Y. Author C is a member of committee Z.

OR if no conflict exists, Conflict of Interest: Author A declares that he/she has no conflict of interest. Author B declares that he/she has no conflict of interest.

In case animals were involved. Ethical approval : All applicable international, national, and/or institutional guidelines for the care and use of animals were followed.

And/or in case humans were involved. Ethical approval: All procedures performed in studies involving human participants were in accordance with the ethical standards of the institutional and/or national research committee and with the 1964 Helsinki declaration and its later amendments or comparable ethical standards.

If your article does not contain studies with human participants or animals by any of the authors, please select one of the following statements: **Ethical approval:** This article does not contain any studies with human participants performed by any of the authors.
Or: This article does not contain any studies with animals performed by any of the authors.
Or: This article does not contain any studies with human participants or animals performed by any of the authors.

In case humans are involved. Informed consent: Informed consent was obtained from all individual participants included in the study.

Thank you very much for your cooperation!
