Challenges and Solutions related to Xenobiotics and Antimicrobial Resistance in the Framework of Urban Wastewater Reuse: Towards a Blue Circle Society

About XENOWAC II

The Conference embraces the work performed in the framework of NEREUS COST Action ES1403 and H2020-MSCA-ITN-2015/675530 ANSWER, both coordinated by Nireas International Water Research Center of the University of Cyprus.

Sessions

Session 1: Fate of contaminants of emerging concern and antimicrobial resistance in urban wastewater treatment plants
- “New” organic contaminants of emerging concern in wastewater
- Transformation products of organic contaminants
- Microbiome and resistome in wastewater
- Known and emerging pathogens in wastewater effluents
- Fate of non-cell associated antibiotic resistance genes (ARGs) in wastewater
- Assessment of antibiotic effects on ARGs persistence and dissemination at WWTP-relevant concentrations

Session 2: Contaminants of emerging concern and antimicrobial resistance: From urban wastewater treatment plants to the environment
- Behaviour, transmission and fate in receiving environments
- Uptake, translocation and metabolism in crops
- Fate prediction using modeling approaches

Session 3: Bioassays/tests to support urban treated wastewater quality management
- Effect-based bioassays as a component of reuse schemes
- Whole Effluent Toxicity testing
- Standardization of sampling, analytical protocols, and use of different bioassays for common endpoints
- Stress measurements and effects related to ARGs dissemination
- Phytophobic effects on crops irrigated with treated wastewater
- Effects on the nutritional value of crops irrigated with treated wastewater
- Human health aspects

Session 4: Technologies to meet urban treated wastewater reuse characteristics
- Impact of WWTP technologies to address reuse challenges
- Disinfection processes and technologies to address reuse challenges
- Emerging technologies to address reuse challenges
- Large (real-scale) wastewater reuse project

Session 5: Risk assessment and policy development
- Data management and prioritisation
- Risk assessment approaches, frameworks and sensitivity analysis
- Human- and environmental-based trigger values
- Determination of targets and cut-off values for qPCR-based diagnostic evaluation of ARGs in effluents
- Inclusion of molecular biological tools and bioassays in legislation
- International and national policy developments

Highlights

Big Blue Talks (Plenary talks):
http://www.xenowac2018.com/speakers/

Keynote talks:
http://www.xenowac2018.com/

Round table Discussions:
http://www.xenowac2018.com/roundtables/

Panel Discussions:
http://www.xenowac2018.com/

Water JPI Satellite Event:

XENOWAC II Science Slam:

10-12 October 2018, LIMASSOL, CYPRUS
GrandResort Hotel
www.xenowac2018.com

Deadline for abstract submission: April 21, 2018

Conference Organizer: Nireas International Water Research Center of the University of Cyprus (Nireas-IWRC, UCY)
Conference Chair: Assoc. Prof. Despo Fatta-Kassinos, Nireas-IWRC, UCY
Contact: TopKinisis Conferences and Events, E-mail: synedrio@topkinisis.com

Attendee Category  Early Registration prior 30 June 2018  Late Registration post 1 July 2018
Regular / Industry  500 €  550 €
Master or PhD Student  300 €  350 €
Accompanying Person  200 €  200 €
Environmental Science and Pollution Research
