

1. Manuscripts, in *quadruplicate* and in English, should be submitted to the *Editor-in-Chief*:

Prof. George A. Anastassiou
Editor-in-Chief, *Journal of Computational Analysis and Applications*
Department of Mathematical Sciences
The University of Memphis
Memphis, Tennessee 38152 USA

Tel.: (901) 678-3144
fax: (901) 678-2480
e-mail: ganastss@memphis.edu
URL: <http://www.msci.memphis.edu/~anastasg/anlyjour.htm>

Authors may submit a list of six possible referees, and may recommend a member of the Editorial Board to oversee the refereeing process.

2. Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Plenum Publishing Corporation will be required before the manuscript can be accepted for publication. The *Editor-in-Chief* will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.
3. Type double-spaced on one side of 8 1/2 × 11 inch white paper using generous margins on all sides, and submit the original and three copies (including copies of all illustrations and tables). All copies must be dark, sharp, and clear. Computer-generated manuscripts *must* be of letter quality (*not* dot-matrix). Manuscripts should not exceed 24 pages, and should preferably be typed using TEX, LaTeX, AMS-TEX, or AMS-LaTeX.
4. A title page is to be provided and should include the title of the article, author's name (*no degrees*), author's affiliation, and suggested running head. The affiliation should comprise the department, institution (usually university or company), city, and state (or nation) and should be typed as a footnote to the author's name. The suggested running head should be less than 80 characters (including spaces) and should comprise the article title or an abbreviated version thereof. For office purposes, the title page should include the complete mailing address, telephone number, fax number, and e-mail address of the one author designated to review proofs.
5. An abstract is to be provided, preferably no longer than *150 words*.
6. A list of 3–6 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes.

Author Instructions Journal of Computational Analysis and Applications

7. All sections should be numbered with Arabic numerals (such as **1. INTRODUCTION**). Subsections should be identified with section and subsection numbers (such as **6.1. Second–Value Subheading**). If applicable, an independent single–number system (one for each category) should be used to label all theorems, lemmas, propositions, corollaries, definitions, remarks, examples, etc. The label (such as **Example 4**) should be typed with paragraph indentation, followed by a period and the example itself.
8. Mathematical notation should be typewritten wherever possible. If handwritten notation must be used, it should be clear and legible, with any necessary explanatory notes located in the margin. Equations should be numbered consecutively with Arabic numerals in parentheses placed flush right, and should be thusly referred to in the text [such as Eqs. (2) and (6)].
9. Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. The captions for illustrations should be typed on a separate sheet of paper. All illustrations must be complete and final, i.e., camera–ready. Photographs should be large, glossy prints, showing high contrast. Drawings should be high–quality laser prints or should be prepared with india ink. Either original drawings or good–quality photographic prints are acceptable. Artwork for each figure should be provided on a separate sheet of paper. Identify figures on the back with author’s name and number of the illustration.
10. Tables should be numbered (with *Roman* numerals) and referred to by number in the text. Each table should be typed on a separate sheet of paper. Center the title above the table, and type explanatory footnotes (indicated by superscript lowercase letters) below the table.
11. List references alphabetically at the end of the paper and number them consecutively. Use the appropriate Arabic numeral in square brackets on the baseline for citation in the text. Where there are three or more authors, only the first author’s name is given in the text, followed by *et al.* References should include (in this order): initials and last names of *all* authors, title of article, name of publication, volume number, inclusive pages, and year published. The style and punctuation of the references should conform to that used in the journal – illustrated by the following examples:

Journal Article

1. C. H. Lee and Y. C. Chang, Solution bounds for the discrete Riccati equation and its applications, *J. Optimiz. Theory Appl.* 99, 443–463 (1998).

Book

2. M. Sakawa, *Fuzzy Sets and Interactive Multiobjective Optimization*, Plenum Press, New York, 1993.

Contribution to a Book

3. S. Kilmer, X. Sun, and X. M. Yu, A problem of analytic monotone extension in three dimensions, in *Approximation, Probability, and Related Fields* (G. Anastassiou and S. T. Rachev, eds.), Plenum Press, New York, 1994, pp. 303–313.

12. All acknowledgments (including those for grant and financial support) should be typed in one paragraph on a separate page that directly precedes the References section.
13. Footnotes should be avoided. When their use is absolutely necessary, footnotes should be numbered consecutively using Arabic numerals and should be typed at the bottom of the page to which they refer. Place a line above the footnote, so that it is set off from the text. Use the appropriate superscript numeral for citation in the text.
14. After a manuscript has been accepted for publication and after all revisions have been incorporated, manuscripts should be submitted to the Editor’s Office as hard copy accompanied by electronic files on disk. Label the disk with identifying information – software, journal name, and first author’s last name. **The disk must be the one from which the accompanying manuscript (finalized version) was printed out.** The Editor’s Office cannot accept a disk without its accompanying, matching hard–copy manuscript.

15. **The journal makes no page charges.** Reprints are available to authors, and order forms with the current price schedule are sent with proofs. The designated author receives 25 free reprints of his/her article.
16. **Springer Open Choice.** In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer's online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
