

# Computational Fluid and Solid Mechanics

**Publish your next book in this series!**

## **Aims and Scope**

In recent decades, computational procedures have been continuously advanced and been applied to an increasing extent in engineering and the physical sciences. Mostly, two separate fields have been considered, namely, the analysis of solids and structures and the analysis of fluid flows. These continuous advances in analyses are of much interest to physicists, mathematicians and in particular, engineers. Also, computational fluid and solid mechanics are no longer treated as entirely separate fields of applications, coupled fluid and solid analysis is being pursued.

The objective of the book series is to publish monographs, textbooks, and reference books, on any subject of computational fluid dynamics, computational solid and structural mechanics, and computational multiphysics dynamics. The publications are written by and for physicists, mathematicians and engineers and are to emphasize the modeling, analysis and solution of problems in engineering

## **Titles published in this series include:**

[The Mechanics of Solids and Structures - Hierarchical Modeling and the Finite Element Solution](#)  
**Bucalem, Miguel Luiz; Bathe, Klaus-Jürgen**

[Characteristics Finite Element Methods in Computational Fluid Dynamics](#)  
**Iannelli, Joe**

[The Finite Element Analysis of Shells - Fundamentals](#)  
**Chapelle, Dominique; Bathe, Klaus-Jürgen**

[Discontinuous Finite Elements in Fluid Dynamics and Heat Transfer](#)  
**Li, Ben Q**

[Quasi-Gas Dynamic Equations](#)  
**Elizarova, Tatiana G.**

[Nonlinear Continua](#)  
**Dvorkin, Eduardo N. Goldschmit, Marcela B.**

[Spectral Finite Element Method](#)  
**Gopalakrishnan, Srinivasan; Chakraborty, Abir; Roy Mahapatra, Debiprosad**

# Get Read. Publish With Springer.

## When you publish with Springer your work gets the attention it deserves:

- ▶ dedicated and professional editorial guidance
- ▶ standardized production processes and speedy publication
- ▶ immediate global visibility and availability
- ▶ royalties reflecting a diversity of revenue streams

## Do you want the widest possible continuous readership for your book?

When you publish with us, your work will:

- ▶ always be available in print with print-on-demand
- ▶ be accessible 24/7 worldwide online and on e-reading devices
- ▶ be available to students and peers for 24.95 EUR/USD

## Let your book benefit from being part of the largest STM eBook Collection

Springer's world-leading and highly interdisciplinary eBook Collection is widely used in academic, corporate and governmental libraries. Your eBook will benefit from cross-linking and increased usage through seamless integration with other content on our online content platform SpringerLink.

SpringerLink generates 450 million visits per year, and the Collection has:

- ▶ more than 43,000 eBooks currently available (textbooks, monographs, edited volumes, proceedings)
- ▶ more than 180 online reference works currently available
- ▶ approximately 6,000 new eBooks added per year
- ▶ more than 2,500 online journals

When you publish your book with Springer you will profit from the high usage and visibility of this Collection.

The average number of chapter downloads per eBook in this Collection was 1,409 in 2009.

Your eBook will also be fully hyperlinked and conveniently searchable, qualities that have made eBooks a widely adopted format.

## MyCopy – your book available for 24.95 EUR/USD

Springer offers readers a convenient way to obtain a printed version of your eBook file for personal use: MyCopy.

It allows library patrons to order a softcover for 24.95 EUR/USD, provided their library has access to Springer's eBook Collection.

The MyCopy service is expanding and is currently available in 20 countries. See [springer.com/mycopy](http://springer.com/mycopy)

This unique format will boost the popularity of your book.

## How we help you get more readers

We are committed to optimizing the visibility of your book; our ongoing efforts include:

- ▶ free online review copies for magazines and journals
- ▶ promotional flyer in convenient PDF format
- ▶ inclusion in Google's eBookstore
- ▶ distribution through Amazon, with "Look Inside" feature and Kindle edition
