Collaborative Information Seeking

Best Practices, New Domains and New Thoughts

Series: Computer Supported Cooperative Work

- ▶ Provides a fresh look on collaborative information seeking and retrieval research and practices
- ▶ Combines aspects of theories and systems relating to collaborative search
- ▶ Discusses best practices and applications of collaborative work in information-intensive domains
- ▶ Provides a selection of in-depth chapter to be used in curriculum in different disciplines

Compiled by world-class leaders in the field of collaborative information retrieval and search (CIS), this book centres on the notion that information seeking is not always a solitary activity and working in collaboration to perform information-seeking tasks should be studied and supported.

Covering aspects of theories, models, and applications the book is divided in three parts:

- Best Practices and Studies: providing an overview of current knowledge and state-of-the-art in the field.
- New Domains: covers some of the new and exciting opportunities of applying CIS
- New Thoughts: focuses on new research directions by scholars from academia and industry from around the world.

Collaborative Information Seeking provides a valuable reference for student, teachers, and researchers interested in the area of collaborative work, information seeking/retrieval, and human-computer interaction.
