## **SpringerBriefs in Computer Science**

Series Editors: S. Zdonik (et al.)

SpringerBriefs present concise summaries of cutting-edge research and practical applications across a wide spectrum of fields. Featuring compact volumes of 50 to 125 pages, the series covers a range of content from professional to academic.

Typical topics might include:

- A timely report of state-of-the art analytical techniques
- A bridge between new research results, as published in journal articles, and a contextual literature review
- A snapshot of a hot or emerging topic
- An in-depth case study or clinical example
- A presentation of core concepts that students must understand in order to make independent contributions

Briefs allow authors to present their ideas and readers to absorb them with minimal time investment. Briefs will be published as part of Springer's eBook collection, with millions of users worldwide. In addition, Briefs will be available for individual print and electronic purchase. Briefs are characterized by fast, global electronic dissemination, standard publishing contracts, easy-to-use manuscript preparation and formatting guidelines, and expedited production schedules. We aim for publication 8–12 weeks after acceptance. Both solicited and unsolicited manuscripts are considered for publication in this series.

\*\*Indexing: This series is indexed in Scopus, Ei-Compendex, and zbMATH \*\*

### **Recently published:**

H. Alvari, E. Shaabani, P. Shakarian  
**Identification of Pathogenic Social Media Accounts**  
From Data to Intelligence to Prediction

D. Gasior  
**Resource Allocation for Software Defined Networks**

O. Marques  
**Image Processing and Computer Vision in iOS**

### **Upcoming Volumes:**

B. Dong, K. Wu, S. Byna  
**User-Defined Tensor Data Analysis**

A.A. Aziz El-Banna, K. Wu  
**Machine Learning Modeling for IoT Networks**  
Internet of Underwater Things
