Atlantis Computational Intelligence Systems

Series Editors: J. Montero de Juan, J. Lu

The book series Computational Intelligence Systems aims at covering state-of-the-art research and development in all fields where computational intelligence is investigated and applied. The series seeks to publish monographs and edited volumes on foundations and new developments in the field of computational intelligence, including fundamental and applied research as well as work describing new, emerging technologies originating from computational intelligence research. Applied CI research may range from CI applications in the industry to research projects in the life sciences, including research in biology, physics, chemistry and the neurosciences. All book proposals submitted to the CIS series will be reviewed by the series editor. After the book has been completed, it will be entirely reviewed by one dedicated editor. Only after this review will the book be published.

Recently published:

F. Matía, G.N. Marichal, E. Jiménez (Eds.)

Fuzzy Modeling and Control: Theory and Applications

Vol. 9

B. Vitoriano, J. Montero de Juan, D. Ruan (Eds.)

Decision Aid Models for Disaster Management and Emergencies

Vol. 7

W. Wang, G. Wets (Eds.)

Computational Intelligence for Traffic and Mobility

Vol. 8
