Neurosurgical Review

Editor-in-Chief: U. Sure

- ▶ Publishes papers dealing with clinical neurosurgery
- ▶ 27 days from submission of manuscript to first decision
- ▶ All manuscripts checked for plagiarism

"Neurosurgical Review" provides a forum for comprehensive reviews on current issues in neurosurgery. Each issue contains up to five reviews, reflecting all important aspects of one topic (a disease or a surgical approach). By providing comprehensive coverage of one topic per issue, "Neurosurgical Review" combines the topicality of professional journals with the in-depth treatment of a monograph. Case reports will generally not be accepted for publication.

Impact Factor: 2.255 (2017), Journal Citation Reports®
