## Ichthyological Research

Editor-in-Chief: Y. Kai

- ▶ Publishes original research that advances the understanding of the diversity of fishes
- ▶ Covers all aspects of fish biology, including taxonomy, systematics, evolution, biogeography, ecology, ethology, genetics, morphology, and physiology

**Please note, we are currently updating the 2018 Journal Metrics.**

*Ichthyological Research* is an official journal of the Ichthyological Society of Japan and is published quarterly in January, April, July, and November. The journal primarily publishes research papers on original work, either descriptive or experimental, that advances the understanding of the diversity of fishes. *Ichthyological Research* strives to cover all aspects of fish biology, including taxonomy, systematics, evolution, biogeography, ecology, ethology, genetics, morphology, and physiology.

*Ichthyological Research* also publishes timely reviews and commentary on recent progress in active areas of research on fish biology.

The Editor-in-Chief is Yoshiaki Kai, Maizuru Fisheries Research Station, Field Science Education and Research Center, Kyoto University, Kyoto, Japan.

Impact Factor: 0.980 (2018), Journal Citation Reports®
